

BENGALURU Streets for People CHALLENGE

Design competition brief
December 2020

About

Streets for People

CHALLENGE

The ***Streets for People Challenge*** is an initiative of the Smart Cities Mission, Ministry of Housing and Urban Affairs (MoHUA), Government of India, to inspire cities to create walking-friendly streets through quick measures, in response to COVID-19.

The Challenge aims to create flagship walking initiatives in cities, which focus on placemaking and liveability. 113 cities have registered for this Challenge to reimagine their streets as public spaces through the lens of economic regeneration, safety, and child-friendly interventions, in order to ensure a green recovery from COVID-19.

The city-led design competition aims to crowdsource innovative ideas for designing and testing the pilot interventions through quick, low-cost solutions.

City Overview

Bengaluru

Bengaluru, the capital city of Karnataka, is widely known as the “Silicon Valley of India” and boasts of its pleasant climate with serene lakes and gardens. The city has beautifully combined its rich cultural heritage with its technological and industrial accomplishments. This blend of traditions with the modern culture has made Bengaluru one of the most vibrant cosmopolitan cities of India.

The city has emerged as the fifth largest urban agglomeration, and is the second most fast-growing metropolis in India. There are multiple large scale infrastructure projects like the metro rail, suburban rail, etc being planned to keep up with this pace of development.

To complement this scale of development, the city aims to improve the walkability and create public spaces that are lively and safe for all its people.

Call for ideas

The competition is an important step in the **Streets for People Challenge**. It aims to crowdsource innovative ideas from professionals and students from architecture, urban planning, and other relevant fields to design streets for people in their cities.

Following the **test-learn-scale approach**, the competition is looking for economical solutions that are quick, innovative, and easy to test.

The winning designs will be tested on ground using cost-effective tools, in collaboration with the local community.

[Register here for the competition](#)

A woman with dark hair, wearing a blue long-sleeved shirt and jeans, is holding a young child in a plaid shirt. They are both laughing and looking at each other. The woman has a colorful patterned bag slung over her shoulder. They are standing on a sidewalk at night. In the background, there are other people, trees, and a brightly lit restaurant sign that says "RESTAURANT".

The goal of the competition is to reimagine streets as **safe, healthy, and happy public spaces for all!**

Design principles

01 Fair distribution of space

Streets for people ensure **efficient mobility** by offering multiple modes of travel, especially **high quality facilities for public and non-motorised transport**.

02 Safety & Security

Streets for people are **safe for all user groups** by providing segregated spaces for each and incorporating **traffic calming measures**. Personal safety is also ensured, with **good lighting** and 'eyes on the street' through **active street edges and vending**.

03 Comfort

Streets for people are **accessible by all, including the differently-abled. Continuous and even-surfaced footpaths, table-top crossings, ramps, and tactile pavers, wherever level differences occur, seating and trees** are some measures to ensure universal accessibility and better comfort for all users.

04 Sensitivity to local context

Streets for people are **designed to suit the local context, factoring in street activities, patterns of pedestrian movement, nearby land uses, and the needs of the people.** Design interventions can range from contextual street elements to street-level interventions like shared or pedestrianised streets.

05 Liveability

Streets for people are full of life, with **elements that enhance the liveability of the space.** These elements improve conditions for existing users, attract more users, increase retail activity, and **transform the street into a vital public space.**

06 Environmental sustainability

Streets for people promote sustainable modes of transport and **improve local climatic conditions.** Trees and plants help absorb pollutants and improve micro-climatic conditions.

Design tools

Tactical Urbanism is an approach that uses **short-term, low-cost, easy to build, and scalable interventions** to catalyze long term change.

Following this approach, we're looking for design and policy solutions that activate spaces to make it **safe, healthy, and happy**, by:

- Using placemaking elements
- Reorganising existing activities
- Introducing new activities

Importance of community

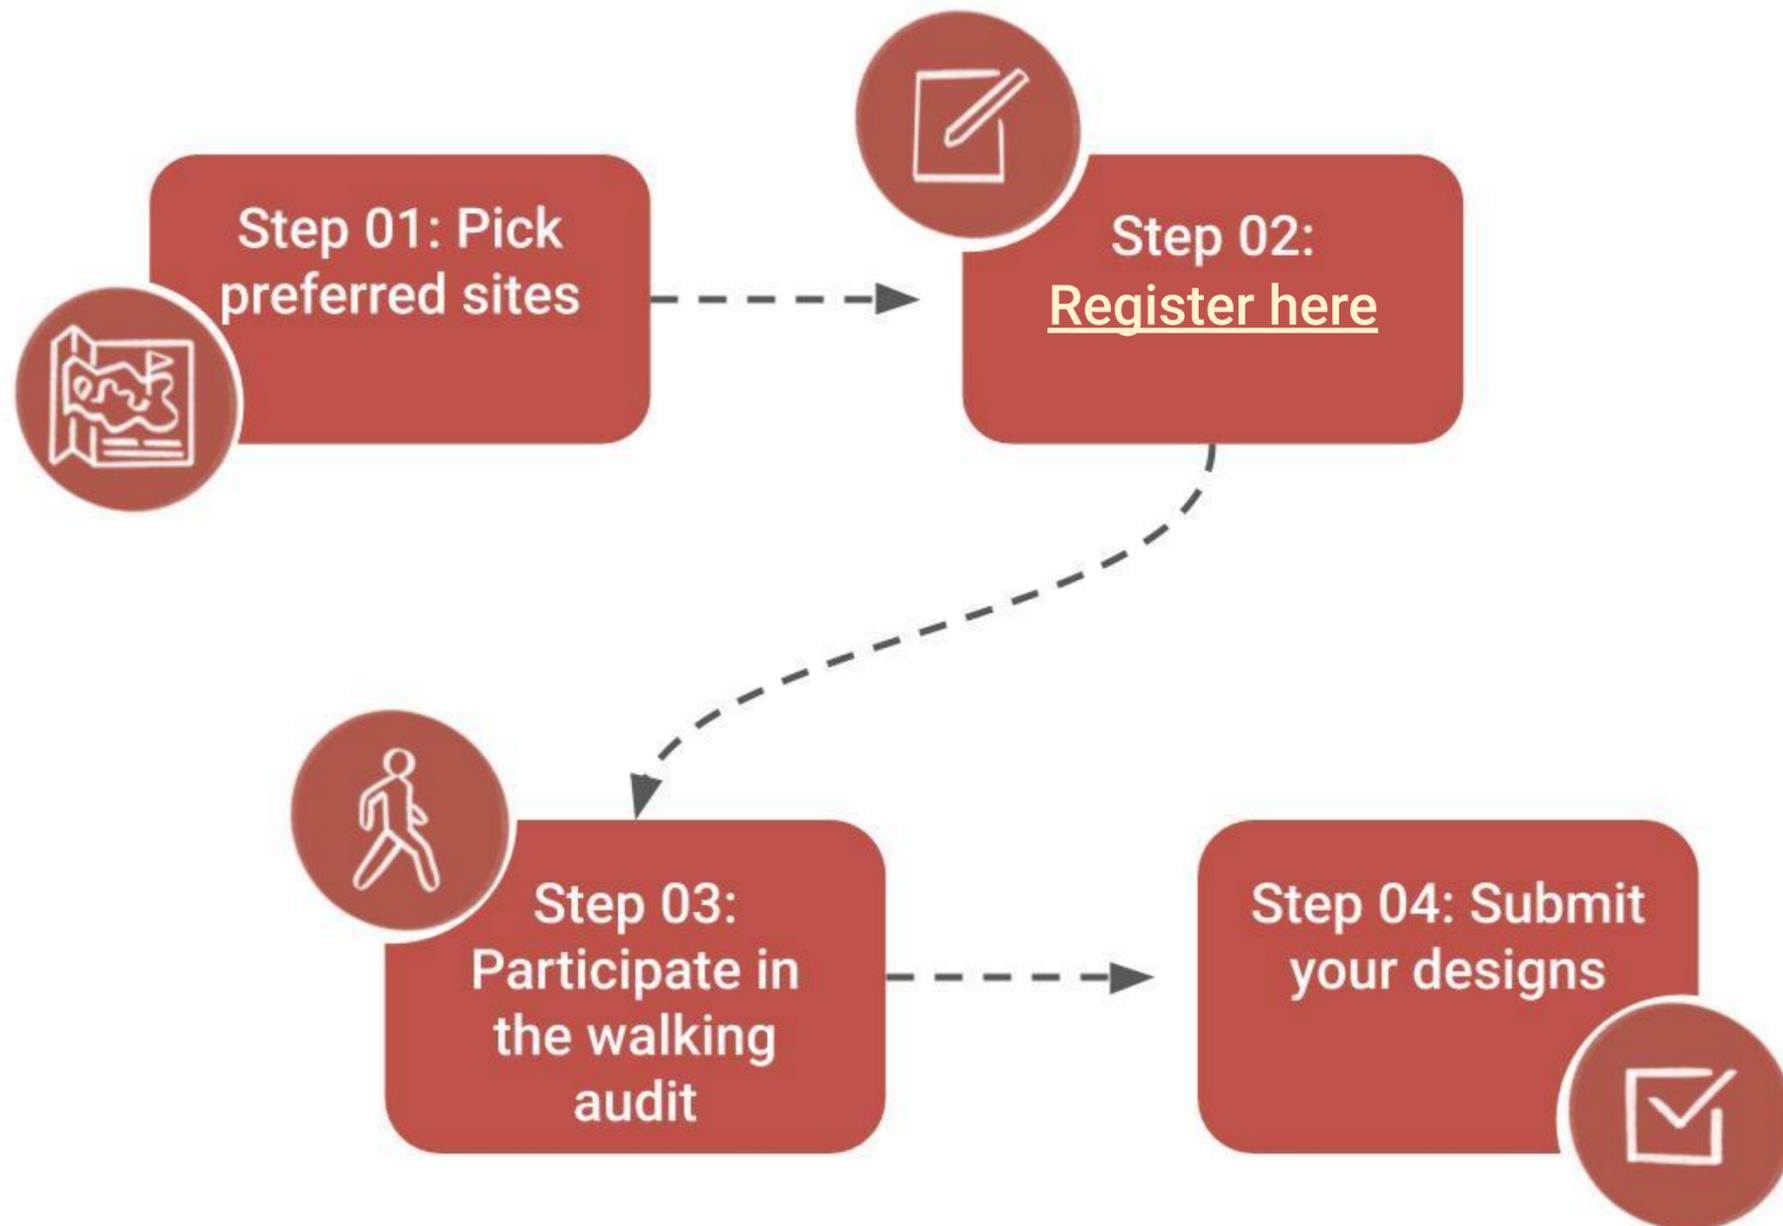

The *Streets for People Challenge* places the **community at the heart** of all design interventions. Emphasising on a bottom-up approach, all design solutions must be in alignment with the **needs of the community** for whom the design is implemented.

Designers must **study and understand the local context** thoroughly and incorporate the findings in the suggested design solutions. Response to local context is a key criteria for final assessments.

The Challenge includes various activities to strengthen the citizen-led approach such as open streets campaigns, walking audits with participants, and perception surveys.

Participation procedure

Here are four steps towards the submission!

- 1 | **Select the sites** for which you wish to develop the design solutions. The information about the sites is provided in the following pages.
- 2 | Next, please **register** through the given link and let us know!
- 3 | Join us for the **walking audit** at the pilot sites.
- 4 | Using the insights from the walking audit, to **develop the design** and **submit them before the deadline!**

We look forward to seeing your awesome design solutions!

Proposal for pilot

Under the **Streets for People Challenge**, the cities will test at least one pilot; comprising of a flagship public space project and a liveable neighbourhood. Hence, this 'call for ideas' include sites for both components. Participants can select either or both of the sites to provide design solutions.

The sites fall under any of the typologies listed below:

Flagship public space:

- 1 | Market / Retail areas
- 2 | Transit hubs

Liveable neighbourhood:

- 1 | Mixed-income neighbourhoods
- 2 | Resettlement colonies
- 3 | Unplanned low-income neighbourhoods

Designing the pilot

Flagship public space

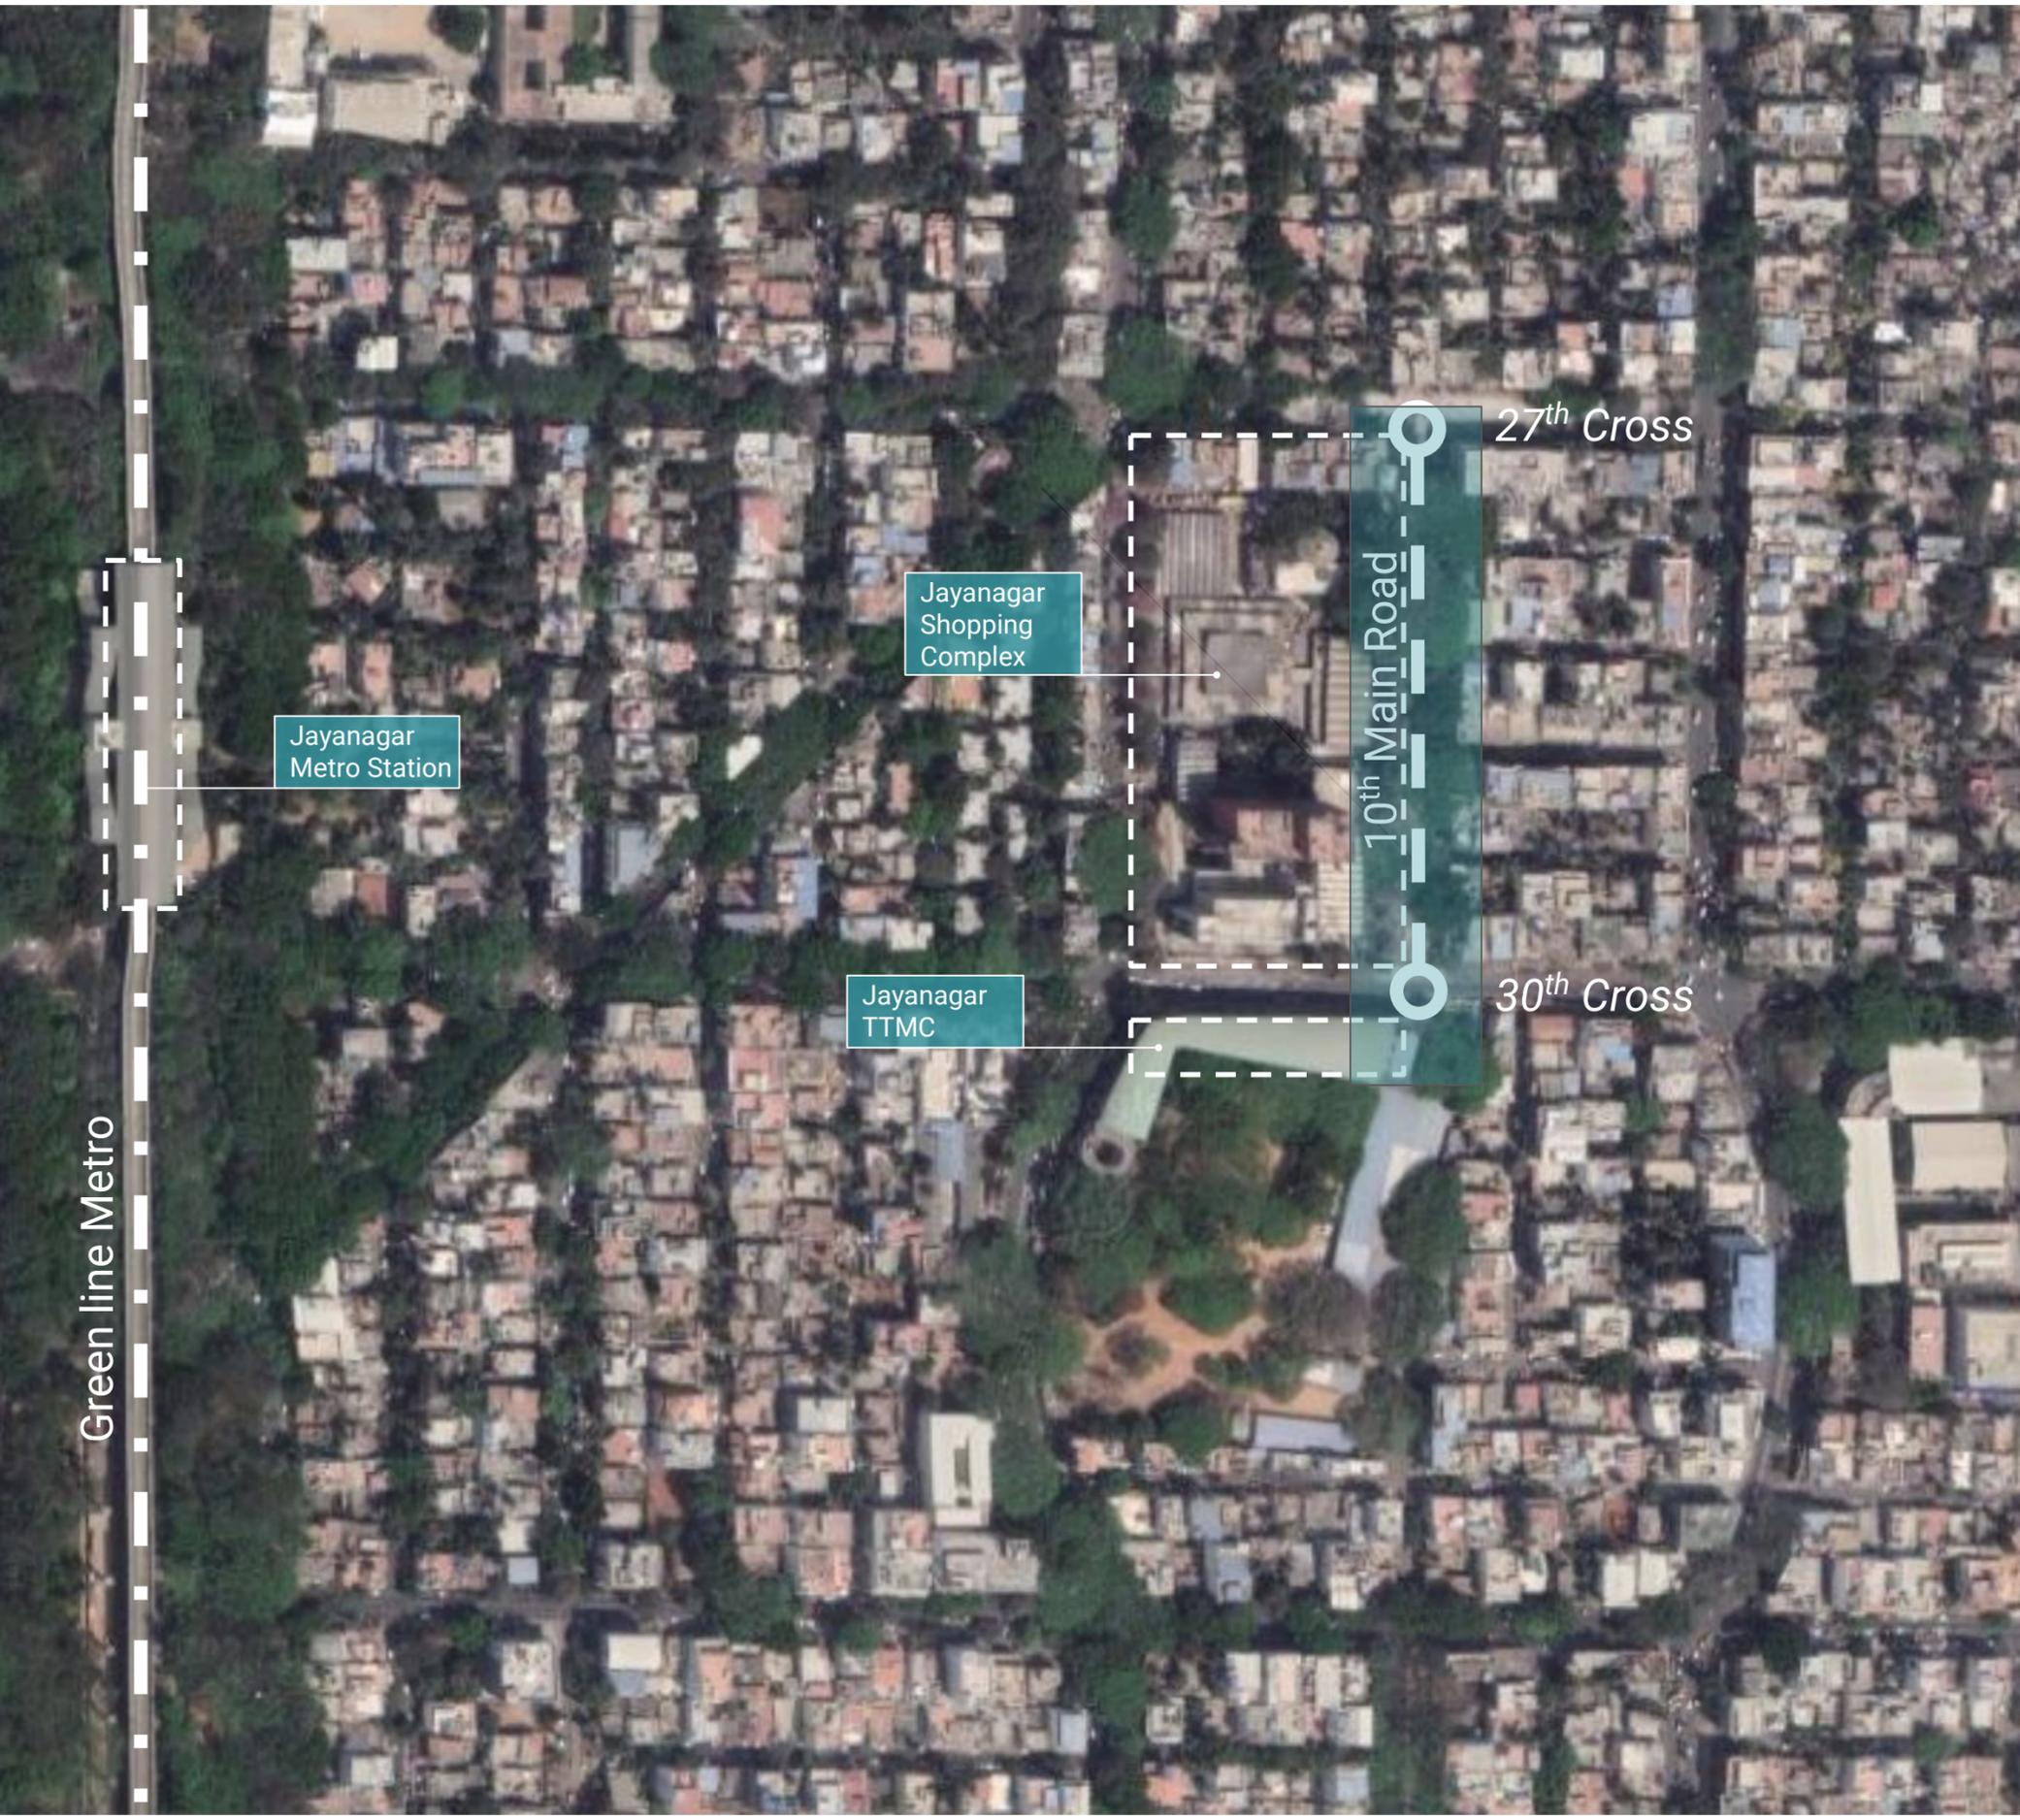

- Understand the local context and city's aspirations
- Demonstrate implementable design concepts through complete or partial pedestrianisation strategies
- The design should respond to the vision of the challenge, to create city-level impact

Liveable neighbourhood

- Understand the local context
- Demonstrate implementable design concepts for creating walkable and liveable neighbourhood in holistic manner.
- The design should respond to the needs of local community and ensure safe, inclusive, and comfortable access to amenities and services.

To know more about the typologies, please check out the [Online Workshop 01 presentation](#)

Flagship pilot site

Site A: Jayanagar 10th main
Length of pilot road: 450m

Jayanagar one of the largest planned residential neighborhoods in the city, has designated commercial areas at 3rd and 4th block. Considered as a one stop destination for all shopping and recreational activities for South Bengaluru., it is well connected to the Jayanagar metro station and TTMC which supports the high footfall in this area.

The pilot stretch consists of 10th Main road extending between 27th cross to 30th cross along the Jayanagar Shopping Complex. This street thrives on the continuous flow of pedestrians encouraging street vendors, food stalls and retail stores. However, shoppers face issues like limited parking spaces, unorganised street vendors and lack of basic infrastructure for a seamless street retail experience.

The design ideas should include strategies of pedestrianisation, street vendor organisation, parking management, place making and make the area around the street safe for walking.

Click [here](#) to download site details

Neighbourhood site

*Site B: Wilson Garden
Area of pilot: 0.5 sq.km*

Wilson Garden is a dense urban neighborhood in central Bengaluru, surrounded by important landmarks like the Shantinagara TTMC, Lalbagh and NIMHANS Hospital. The area contains commercial corridors which cater mainly to the neighborhood.

Though Wilson Garden is a planned residential neighborhood with diverse open spaces, the high through traffic, unregulated parking and hard institutional edges make it unsafe and unsuitable for walking.

The design interventions should explore strategies to improve the quality of existing public spaces and their network, through lively pedestrian linkages and pedestrian friendly streets & plazas that are accessible by all groups of people.

Timeline

Any changes to the timeline will be notified to the participants in advance.

Competition
roll-out
18th Dec
2020

Registration
closes
1st Jan
2021

Walking
Audit
8th Jan
2021

Submission
by 11:59 pm IST
22nd Jan
2021

Announcing
of results
29th Jan
2021

Note

All winning teams are expected to assist the city with:

- Refining the design based on the inputs from community, city officials, and other stakeholders;
- Testing the design on the ground;
- Monitoring and Evaluation of implemented design.

Eligibility criteria

Professionals

Students

Multi-disciplinary collaborations

- Professionals and students in the fields of architecture, urban design, planning & other relevant fields are eligible.
- At least 1 team member should be a local resident of the city, who will serve as the representative.
- Multi-disciplinary collaboration is highly encouraged.
- There is no restriction on the number of members per team.

Evaluation criteria

All submitted design proposals will be evaluated based on the following criteria:

- Originality of idea
- Understanding of the local context
- Inclusivity of the design solutions
- Feasibility of implementation
- Fulfilment of submission requirements in the prescribed format

The entries will be evaluated by local officials, citizens, experts, and other stakeholders.

Participation guidelines

- Participants are free to submit multiple entries per team.
- Participants are free to submit entries for multiple cities and for multiple sites per city.
- Any team assisted by a competition organiser or jury member will be disqualified.

Plagiarism of any ideas or images will be disqualified with a notice.

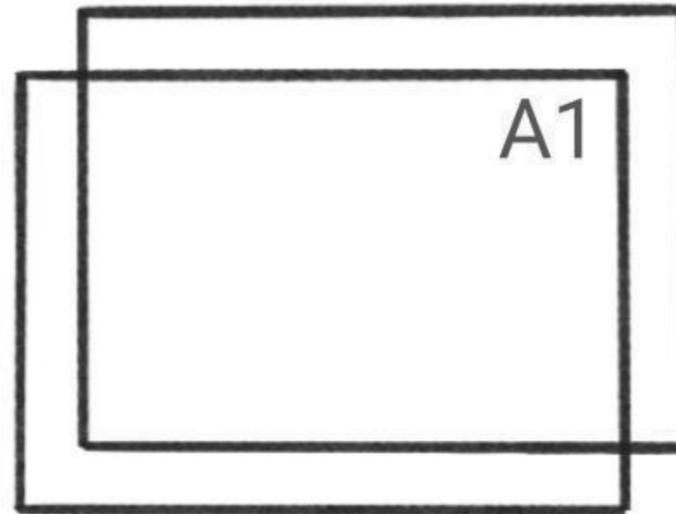

Register here for the competition

Any change in the timeline will be updated on the competition page in the [Streets for People Challenge website](#)

Submission guidelines

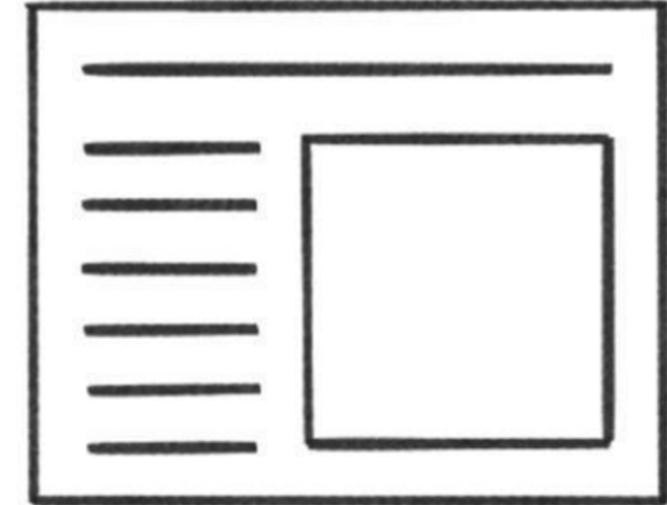

- 1 | Participants should create a shared folder (to be renamed with the competition ID), which must contain the **2 A1 sheets and the slide deck (20 slides)**. **Maximum folder size : 25MB**
- 2 | Team registration ID and sheet number should be mentioned at the right bottom corner of every sheet. Team names, logos or organisation names **should not be mentioned** on the sheets.
3. Participants should share the drive link to the shared folder at (dultbangalore@gmail.com).

For any queries, email us at (dultbangalore@gmail.com)

2 A1 Sheets must be submitted in .pdf/.jpeg format

+

Slide deck of maximum 20 slides

The submission should cover the following :

- Key plan
- Design concept & diagrams
- Detailed plan and sections of the design intervention
- Implementation strategy addressing parking, vending and other on-site challenges
- Rough budget estimate and phasing
- At least 3 renders / views of the design intervention
- 200-300 word write-up about the design intervention

Awards

Shortlisted Entries

Shortlisted entries will be displayed at the *Bengaluru Streets for People Exhibition*, and circulated via the city's social media platforms.

Winning Entries

All winning teams will get the opportunity to present, discuss, and develop their ideas with city officials, experts, and the community.

The winning designs will be tested on ground using quick, innovative, and cost-effective tools.

	<u>1st prize</u>	<u>2nd prize</u>	<u>3rd prize</u>
Jayanagar 10th Main	30,000/-	20,000/-	10,000/-
Wilson Garden	25,000/-	15,000/-	5,000/-
