About
Streets for People
CHALLENGE

The *Streets for People Challenge* is an initiative of the Smart Cities Mission, Ministry of Housing and Urban Affairs (MoHUA), Government of India, to inspire cities to create walking-friendly streets through quick measures, in response to COVID-19.

The Challenge aims to create flagship walking initiatives in cities, which focus on placemaking and liveability. 113 cities have registered for this Challenge to reimagine their streets as public spaces through the lens of economic regeneration, safety, and child-friendly interventions, in order to ensure a green recovery from COVID-19.

The city-led design competition aims to crowdsource innovative ideas for designing and testing the pilot interventions through quick, low-cost solutions.

Contents

City overview

Gurugram

Gurugram is a city in the state of Haryana, located 30 Km south of the New Delhi and one of the major satellite cities for National Capital of the country. It has the 3rd highest per capita income in India after Chandigarh and Mumbai.

City has thousands years of history but saw rapid development over last 25 years. Today, it has become a hub of multinational companies, industries giants, call centers, software companies, shopping malls and skyscrapers.

The city has all modes of transport including Railways, Metro, Buses, Auto rickshaws, Cabs and is located in immediate vicinity of Indira Gandhi International Airport, Delhi

Call for ideas

The competition is an important step in the *Streets for People Challenge.* It aims to crowdsource innovative ideas from professionals and students from architecture, urban planning, and other relevant fields to design streets for people in their cities.

Following the **test-learn-scale approach**, the competition is looking for economical solutions that are quick, innovative, and easy to test.

The winning designs will be tested on ground using cost-effective tools, in collaboration with the local community.

Register here for the competition

The goal of the competition is
to reimagine streets as
**safe, healthy, and happy
public spaces for all!**

Design principles

01
Fair distribution of space

Streets for people ensure **efficient mobility** by offering multiple modes of travel, especially **high quality facilities for public and non-motorised transport.**

02
Safety & Security

Streets for people are **safe for all user groups** by providing segregated spaces for each and incorporating **traffic calming measures.** Personal safety is also ensured, with **good lighting** and **'eyes on the street'** through **active street edges and vending.**

Source: Bangalore mirror

03
Comfort

Streets for people are **accessible by all, including the differently-abled. Continuous and even-surfaced footpaths, table-top crossings, ramps, and tactile pavers, wherever level differences occur, seating and trees** are some measures to ensure universal accessibility and better comfort for all users.

04
Sensitivity to local context

Streets for people are **designed to suit the local context, factoring in street activities, patterns of pedestrian movement, nearby land uses, and the needs of the people.** Design interventions can range from contextual street elements to street-level interventions like shared or pedestrianised streets.

Source: Incredible India

05
Liveability

Streets for people are full of life, with **elements that enhance the liveability of the space**. These elements improve conditions for existing users, attract more users, increase retail activity, and **transform the street into a vital public space.**

06
Environmental sustainability

Streets for people promote sustainable modes of transport and **improve local climatic conditions.** Trees and plants help absorb pollutants and improve micro-climatic conditions.

Source: Townshend Landscape Architects

Design tools

Tactical Urbanism is an approach that uses **short-term, low-cost, easy to build,** and **scalable interventions** to catalyze long term change.

Following this approach, we're looking for design and policy solutions that activate spaces to make it **safe, healthy, and happy,** by:

- Using placemaking elements
- Reorganising existing activities
- Introducing new activities
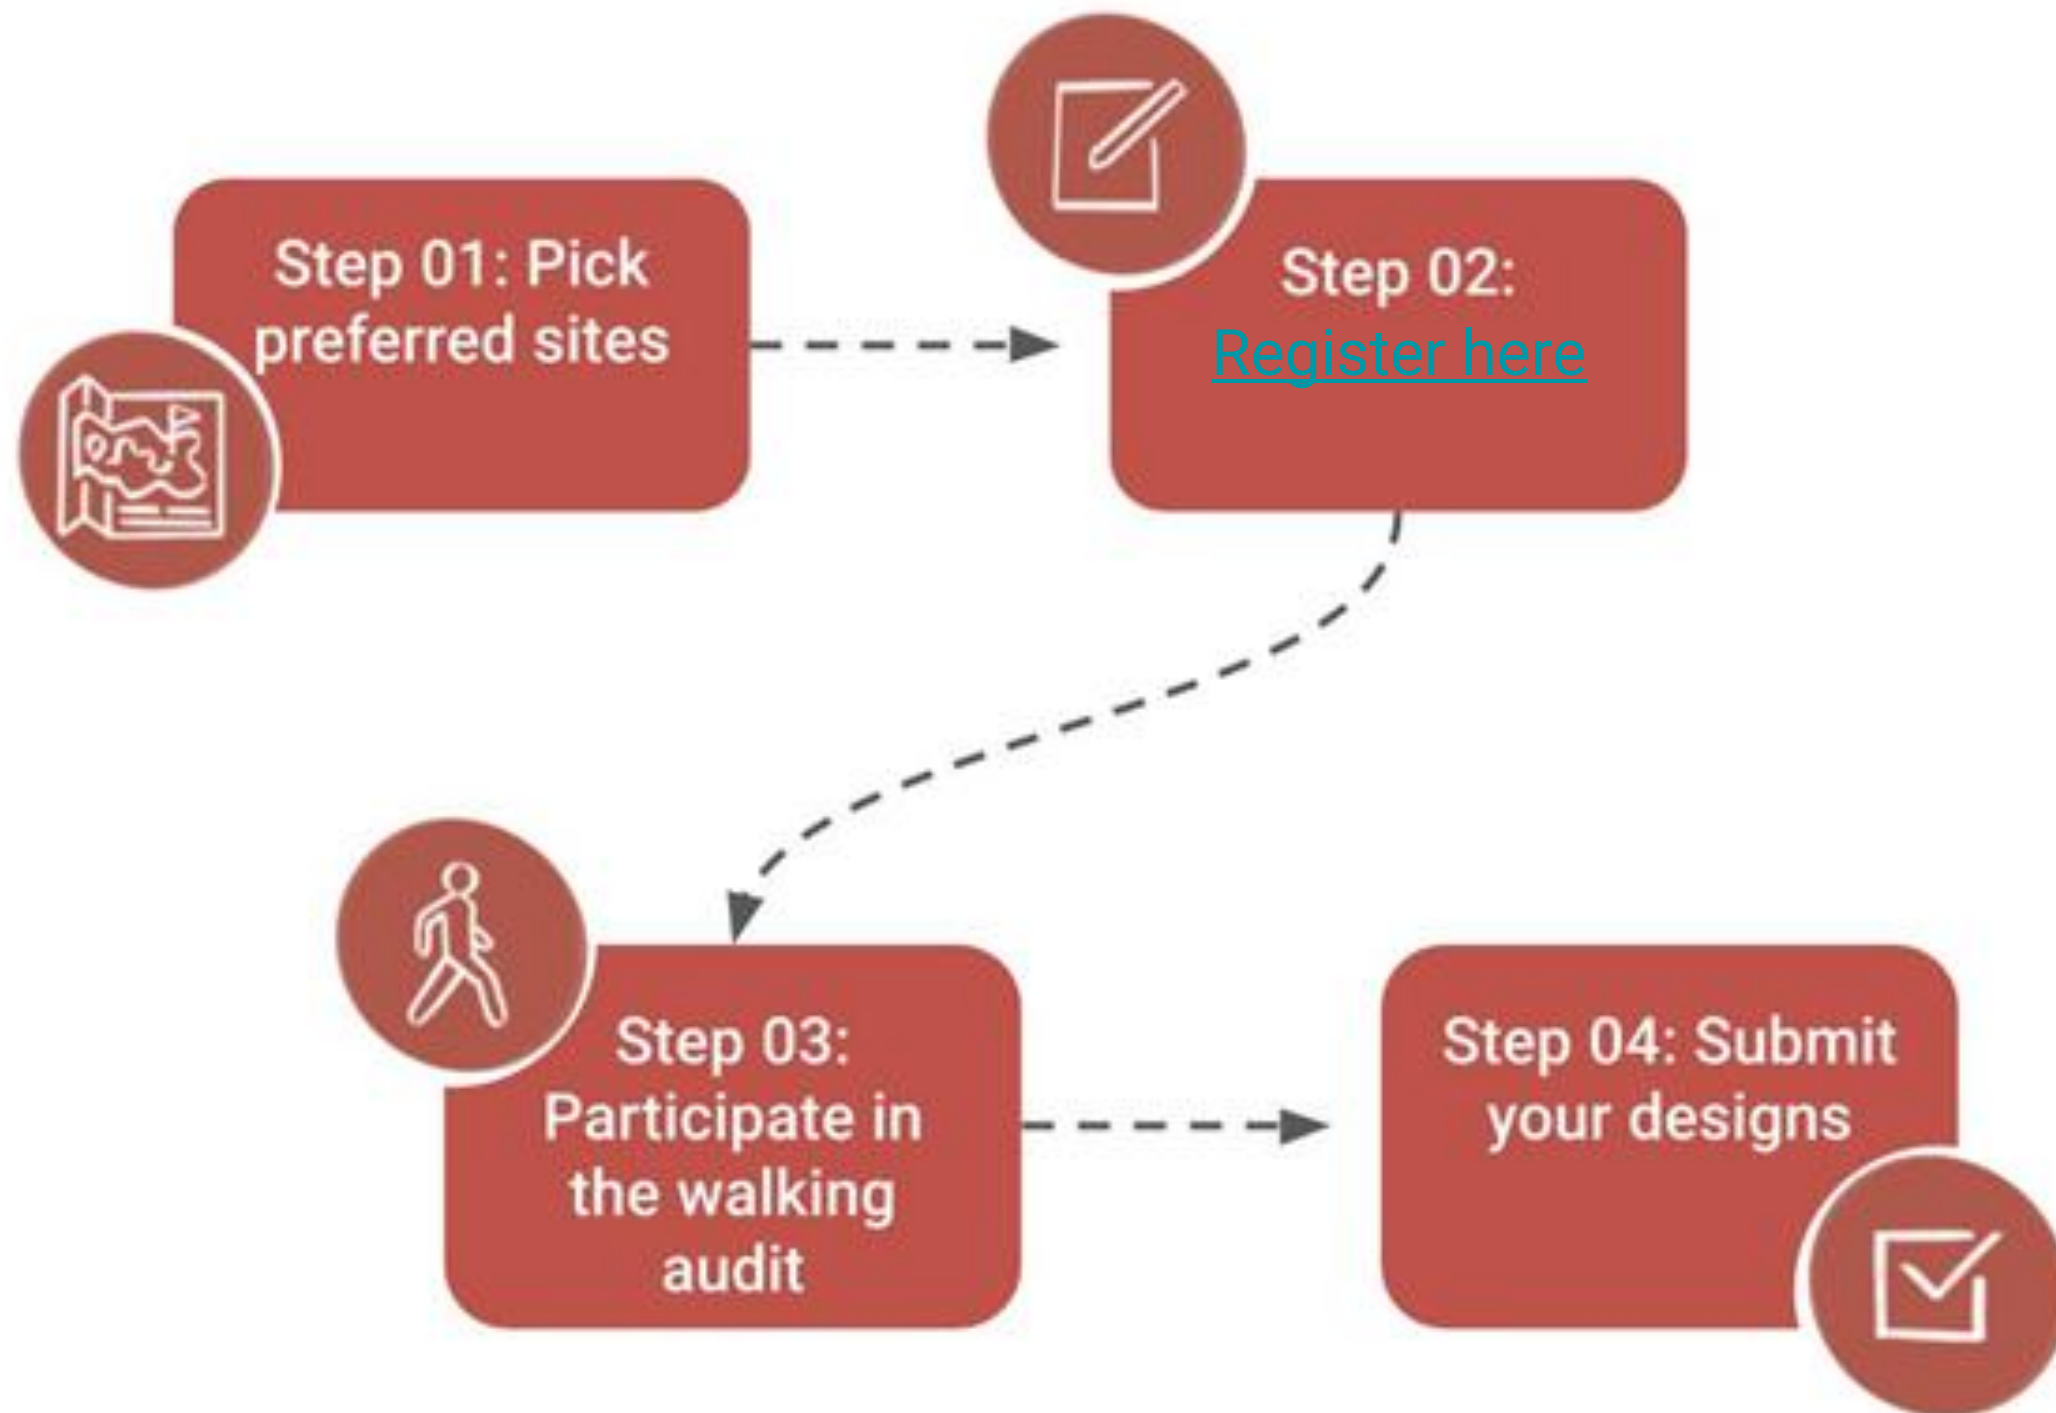

Importance of community

The *Streets for People Challenge* places the **community at the heart** of all design interventions. Emphasising on a bottom-up approach, all design solutions must be in alignment with the **needs of the community** for whom the design is implemented.

Designers must **study and understand the local context** thoroughly and incorporate the findings in the suggested design solutions. Response to local context is a key criteria for final assessments.

The Challenge includes various activities to strengthen the citizen-led approach such as open streets campaigns, walking audits with participants, and perception surveys.

Participation procedure

Step 01: Pick preferred sites

Step 02:
[Register here](#)

Step 03: Participate in the walking audit

Step 04: Submit your designs

Here are four steps towards the submission!

1 | **Select the sites** for which you wish to develop the design solutions. The information about the sites is provided in the following pages.

2 | Next, please **register** through the given link and let us know!

3 | Join us for the **walking audit** at the pilot sites.

4 | Using the insights from the walking audit, to **develop the design** and **submit them before the deadline!**

We look forward to seeing your awesome design solutions!

Proposal for pilot

Under the **Streets for People Challenge,** the cities will test at least one pilot; comprising of a flagship public space project and a liveable neighbourhood. Hence, this **'call for ideas'** include sites for both components. Participants can select either or both of the sites to provide design solutions.

The sites fall under any of the typologies listed below:

Flagship public space:
1 | Market / Retail areas
2 | Transit hubs

Liveable neighbourhood:
1 | Mixed-income neighbourhoods
2 | Resettlement colonies
3 | Unplanned low-income neighbourhoods

Designing the pilot
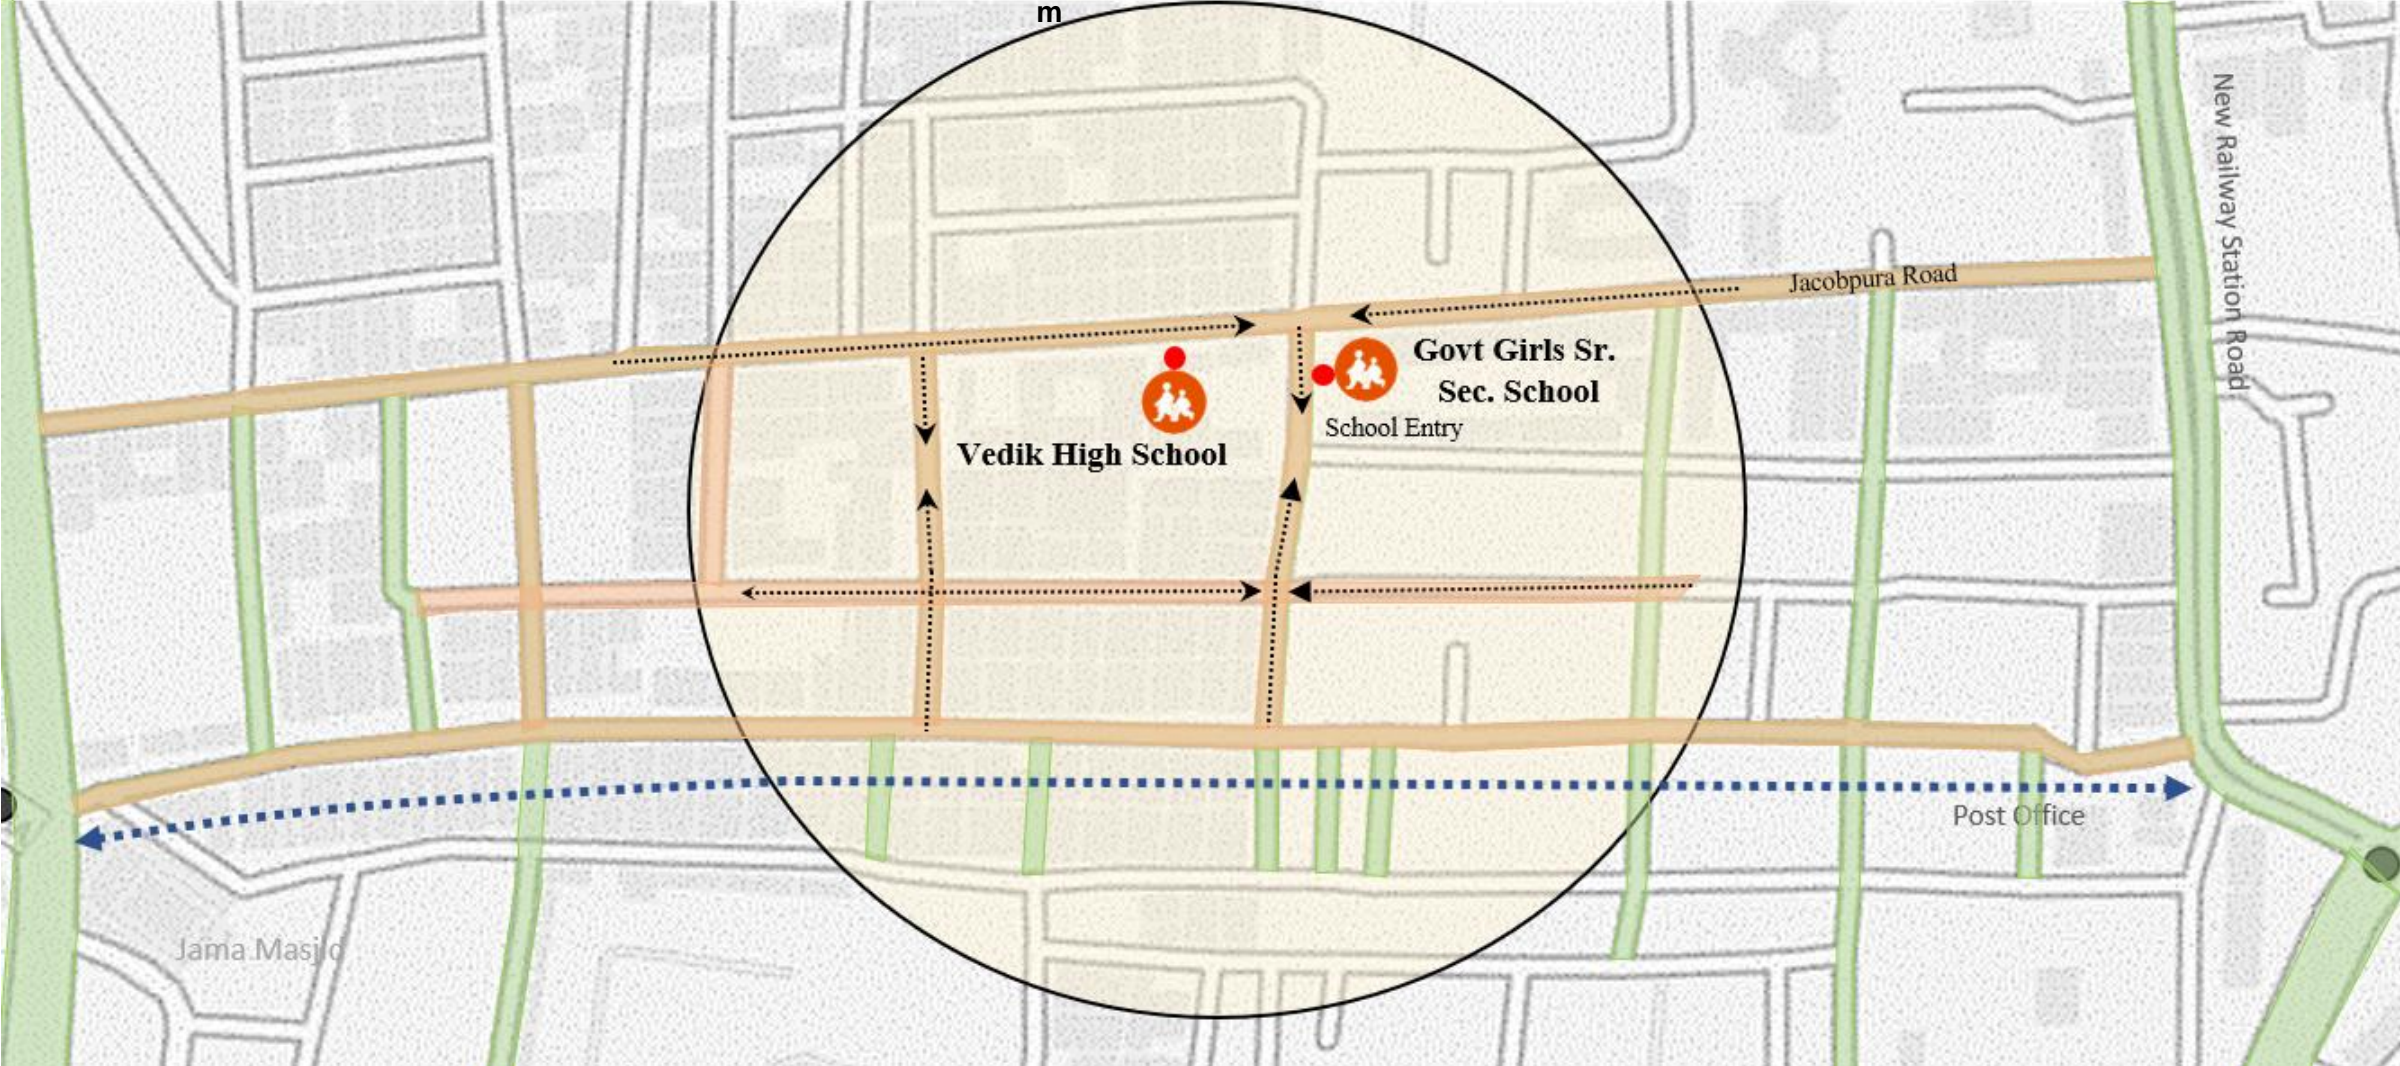

Flagship public space
- Understand the local context and city's aspirations
- Demonstrate implementable design concepts through complete or partial pedestrianisation strategies
- The design should respond to the vision of the challenge, to create city-level impact

Liveable neighbourhood
- Understand the local context
- Demonstrate implementable design concepts for creating walkable and liveable neighbourhood in holistic manner.
- The design should respond to the needs of local community and ensure safe, inclusive, and comfortable access to amenities and services.

To know more about the typologies, please check out the *Online Workshop 01 presentation*

Flagship Pilot Site

Site A: Sadar Bazar Market Street
Length of the Street 600M

Thousands of people visit the city's oldest and busiest market street, Sadar Bazaar. It is one-stop solution for comprehensive shopping at affordable prices. It also has a historic importance dating back to 19th century, parts of which are noticeable through its architecture, road network and local culture.

The site for the competition includes 600m Sadar Bazaar street, starting from T point at New Railway road, near post office until Sohna Chowk on Old Railway road near Mosque

The design solution should intervene at the market street stretch, and also include a strategy to make the area around the street walking friendly, so as to enhance mobility in the influence zone.

Click here to download site details

Neighbourhood site

Site B: School Zone, Near Vedic School and Government Girls schools, Sadar Bazaar Area of pilot: Radius of 50M from the School entrances.

This project looks into an opportunity of creating safer access to school and setting an example for similar school clusters around the city.

As the complete pedestrianization of main street would direct traffic on other streets, it becomes important to carefully design for the vulnerable users such as children and design infrastructure from their perspective. The submission ideas are to make school zone safer, inclusive, inviting, and engaging for children.

The site for the competition extends 50m in radius from school entrances.

The design solution should also include a strategy to make the area around the street walking friendly.

Timeline

Any changes to the timeline will be notified to the participants in advance.

Competition roll-out
5th Dec 2020

Registration closes
15thth Dec 2020

Walking Audit
18th Dec 2020

Submission by 11:59 pm IST
3rd Jan 2021

Announcing of results
8th Jan 2021

Note

All winning teams are expected to assist the city with:

- Refining the design based on the inputs from community, city officials, and other stakeholders;
- Testing the design on the ground;
- Monitoring and Evaluation of implemented design.

Eligibility criteria

Professionals

Students

Multi-disciplinary collaborations

- Professionals and students in the fields of architecture, urban design, planning & other relevant fields are eligible.
- At least 1 team member should be a local resident of the city, who will serve as the representative.
- Multi-disciplinary collaboration is highly encouraged.
- There is no restriction on the number of members per team.

Evaluation criteria

All submitted design proposals will be evaluated based on the following criteria:

- Originality of idea
- Understanding of the local context
- Inclusivity of the design solutions
- Feasibility of implementation
- Fulfilment of submission requirements in the prescribed format

The entries will be evaluated by local officials, citizens, experts, and other stakeholders.

Participation guidelines

- Participants are free to submit multiple entries per team.
- Participants are free to submit entries for multiple cities and for multiple sites per city.
- Any team assisted by a competition organiser or jury member will be disqualified.

Plagiarism of any ideas or images will be disqualified with a notice.

Register here for the competition

Any change in the timeline will be updated on the competition page in the
*Streets for People Challenge website*

Submission guidelines

1 | Participants should create a shared folder (to be renamed with the competition ID), which must contain the **2 A1 sheets and the slide deck (20 slides). Maximum folder size : 25MB**

2 | Team registration ID and sheet number should be mentioned at the right bottom corner of every sheet. Team names, logos or organisation names **should not be mentioned** on the sheets.

3. Participants should share the drive link to the shared folder at s4p@mcg.gov.in.

For any queries, email us at
s4p@mcg.gov.in

A1

+
2 A1 Sheets must be submitted in .pdf/.jpeg format
Slide deck of maximum 20 slides

The submission should cover the following :
- Key plan
- Design concept & diagrams
- Detailed plan and sections of the design intervention
- Implementation strategy addressing parking, vending and other on-site challenges
- Rough budget estimate and phasing
- At least 3 renders / views of the design intervention
- 200-300 word write-up about the design intervention

Awards

Shortlisted Entries

Shortlisted entries will be displayed at the **GURUGRAM Streets for People Exhibition,** and circulated via the city's social media platforms.

Winning Entries

All winning teams will get the opportunity to present, discuss, and develop their ideas with city officials, experts, and the community.

The winning designs will be tested on ground using quick, innovative, and cost-effective tools.

	1st prize	2nd prize	3rd prize
1. Site A: Complete pedestrianization	Rs. 15000	Rs. 10000	Rs. 7000
2. Site B: Safer Access to School	Rs. 15000	Rs. 10000	Rs. 7000

All winning entries will receive a certificate from MCG in recognition of their work.
