

About

Streets for People

CHALLENGE

The ***Streets for People Challenge*** is an initiative of the Smart Cities Mission, Ministry of Housing and Urban Affairs (MoHUA), Government of India, to inspire cities to create walking-friendly streets through quick measures, in response to COVID-19.

The Challenge aims to create flagship walking initiatives in cities, which focus on placemaking and liveability. 113 cities have registered for this Challenge to reimagine their streets as public spaces through the lens of economic regeneration, safety, and child-friendly interventions, in order to ensure a green recovery from COVID-19.

The city-led design competition aims to crowdsource innovative ideas for designing and testing the pilot interventions through quick, low-cost solutions.

City overview

Udaipur

Udaipur, capital of Rajasthan, is the city of lakes ringed by the Aravali range with a city population of 474,531. The "city of lakes" flanked with City Palace in the walled city and Lake Palace in its crescents.

Udaipur is a royal city that had been the capital of Mewar rulers for centuries. Udaipur is famous for its culture, custom and tradition. It is one of the favourite tourist places in India.

Udaipur is the sixth largest city in Rajasthan and has witnessed considerable population growth in the last 4 decades facilitated by a growing economy which again to a large extent has been generated by an increasing number of tourists. The continuous influx of population in the city has increased pressure on infrastructure facilities.

Call for ideas

The competition is an important step in the ***Streets for People Challenge***. It aims to crowdsource innovative ideas from professionals and students from architecture, urban planning, and other relevant fields to design streets for people in their cities.

Following the **test-learn-scale approach**, the competition is looking for economical solutions that are quick, innovative, and easy to test.

The winning designs will be tested on ground using cost-effective tools, in collaboration with the local community.

[Register here for the competition](#)

A woman in a blue long-sleeved shirt and jeans is holding a young child in a plaid shirt. They are both smiling and laughing. The woman has a patterned bag slung over her shoulder. They are standing on a sidewalk at night. In the background, there are other people, trees, and a brightly lit restaurant sign that says "RESTAURANT".

The goal of the competition is to reimagine streets as **safe, healthy, and happy public spaces for all!**

Design principles

01 Fair distribution of space

Streets for people ensure **efficient mobility** by offering multiple modes of travel, especially **high quality facilities for public and non-motorised transport**.

02 Safety & Security

Streets for people are **safe for all user groups** by providing segregated spaces for each and incorporating **traffic calming measures**. Personal safety is also ensured, with **good lighting** and 'eyes on the street' through **active street edges and vending**.

Source: Bangalore mirror

03 Comfort

Streets for people are **accessible by all, including the differently-abled. Continuous and even-surfaced footpaths, table-top crossings, ramps, and tactile pavers, wherever level differences occur, seating and trees** are some measures to ensure universal accessibility and better comfort for all users.

04 Sensitivity to local context

Streets for people are **designed to suit the local context, factoring in street activities, patterns of pedestrian movement, nearby land uses, and the needs of the people.** Design interventions can range from contextual street elements to street-level interventions like shared or pedestrianised streets.

05 Liveability

Streets for people are full of life, with **elements that enhance the liveability of the space.** These elements improve conditions for existing users, attract more users, increase retail activity, and **transform the street into a vital public space.**

06 Environmental sustainability

Streets for people promote sustainable modes of transport and **improve local climatic conditions.** Trees and plants help absorb pollutants and improve micro-climatic conditions.

Design tools

Tactical Urbanism is an approach that uses short-term, low-cost, easy to build, and scalable interventions to catalyze long term change.

Following this approach, we're looking for design and policy solutions that activate spaces to make it **safe, healthy, and happy**, by:

- Using placemaking elements
- Reorganising existing activities
- Introducing new activities

Importance of community

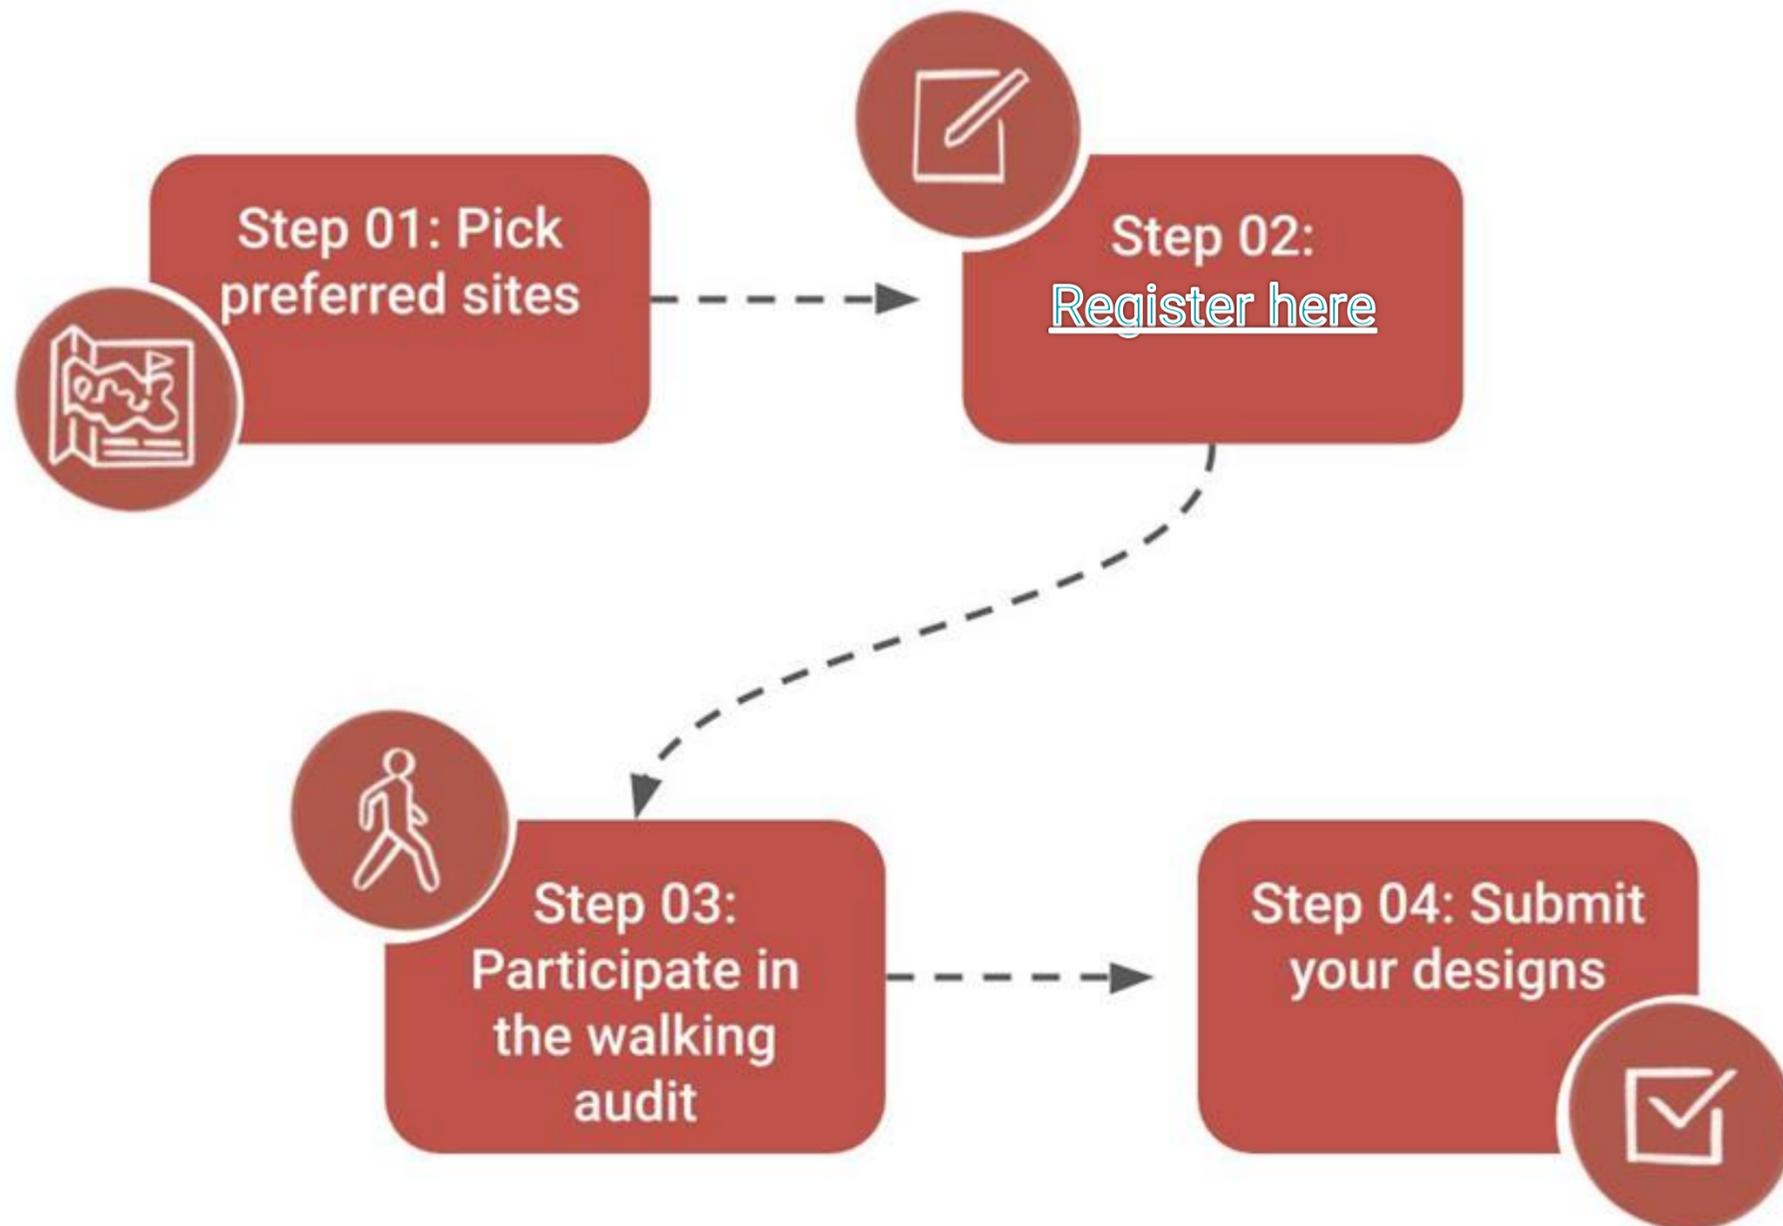

The *Streets for People Challenge* places the **community at the heart** of all design interventions. Emphasising on a bottom-up approach, all design solutions must be in alignment with the **needs of the community** for whom the design is implemented.

Designers must **study and understand the local context** thoroughly and incorporate the findings in the suggested design solutions. Response to local context is a key criteria for final assessments.

The Challenge includes various activities to strengthen the citizen-led approach such as open streets campaigns, walking audits with participants, and perception surveys.

Participation procedure

Here are four steps towards the submission!

- 1 | **Select the sites** for which you wish to develop the design solutions. The information about the sites is provided in the following pages.
- 2 | Next, please **register** through the given link and let us know!
- 3 | Join us for the **walking audit** at the pilot sites.
- 4 | Using the insights from the walking audit, to **develop the design** and **submit them before the deadline!**

We look forward to seeing your awesome design solutions!

Proposal for pilot

Under the **Streets for People Challenge**, the cities will test at least one pilot; comprising of a flagship public space project and a liveable neighbourhood. Hence, this 'call for ideas' include sites for both components. Participants can select either or both of the sites to provide design solutions.

The sites fall under any of the typologies listed below:

Flagship public space:

- 1 | Market / Retail areas
- 2 | Transit hubs

Liveable neighbourhood:

- 1 | Mixed-income neighbourhoods
- 2 | Resettlement colonies
- 3 | Unplanned low-income neighbourhoods

Designing the pilot

Flagship public space

- Understand the local context and city's aspirations
- Demonstrate implementable design concepts through complete or partial pedestrianisation strategies
- The design should respond to the vision of the challenge, to create city-level impact

Liveable neighbourhood

- Understand the local context
- Demonstrate implementable design concepts for creating walkable and liveable neighbourhood in holistic manner.
- The design should respond to the needs of local community and ensure safe, inclusive, and comfortable access to amenities and services.

To know more about the typologies, please check out the [Online Workshop 01 presentation](#)

Flagship pilot site

*Site A: Pahari Bus Stand, Chetak Circle.
Length of pilot: 250 Meters*

The site extends from Chetna Hotel to office of National Informatics Center. This street plays a vital role in the city commutation. It connects important landmarks such as Saheliyu ki Bari, UIT Office, Lok Kala Mandal, Sukhadiya Circle, etc.

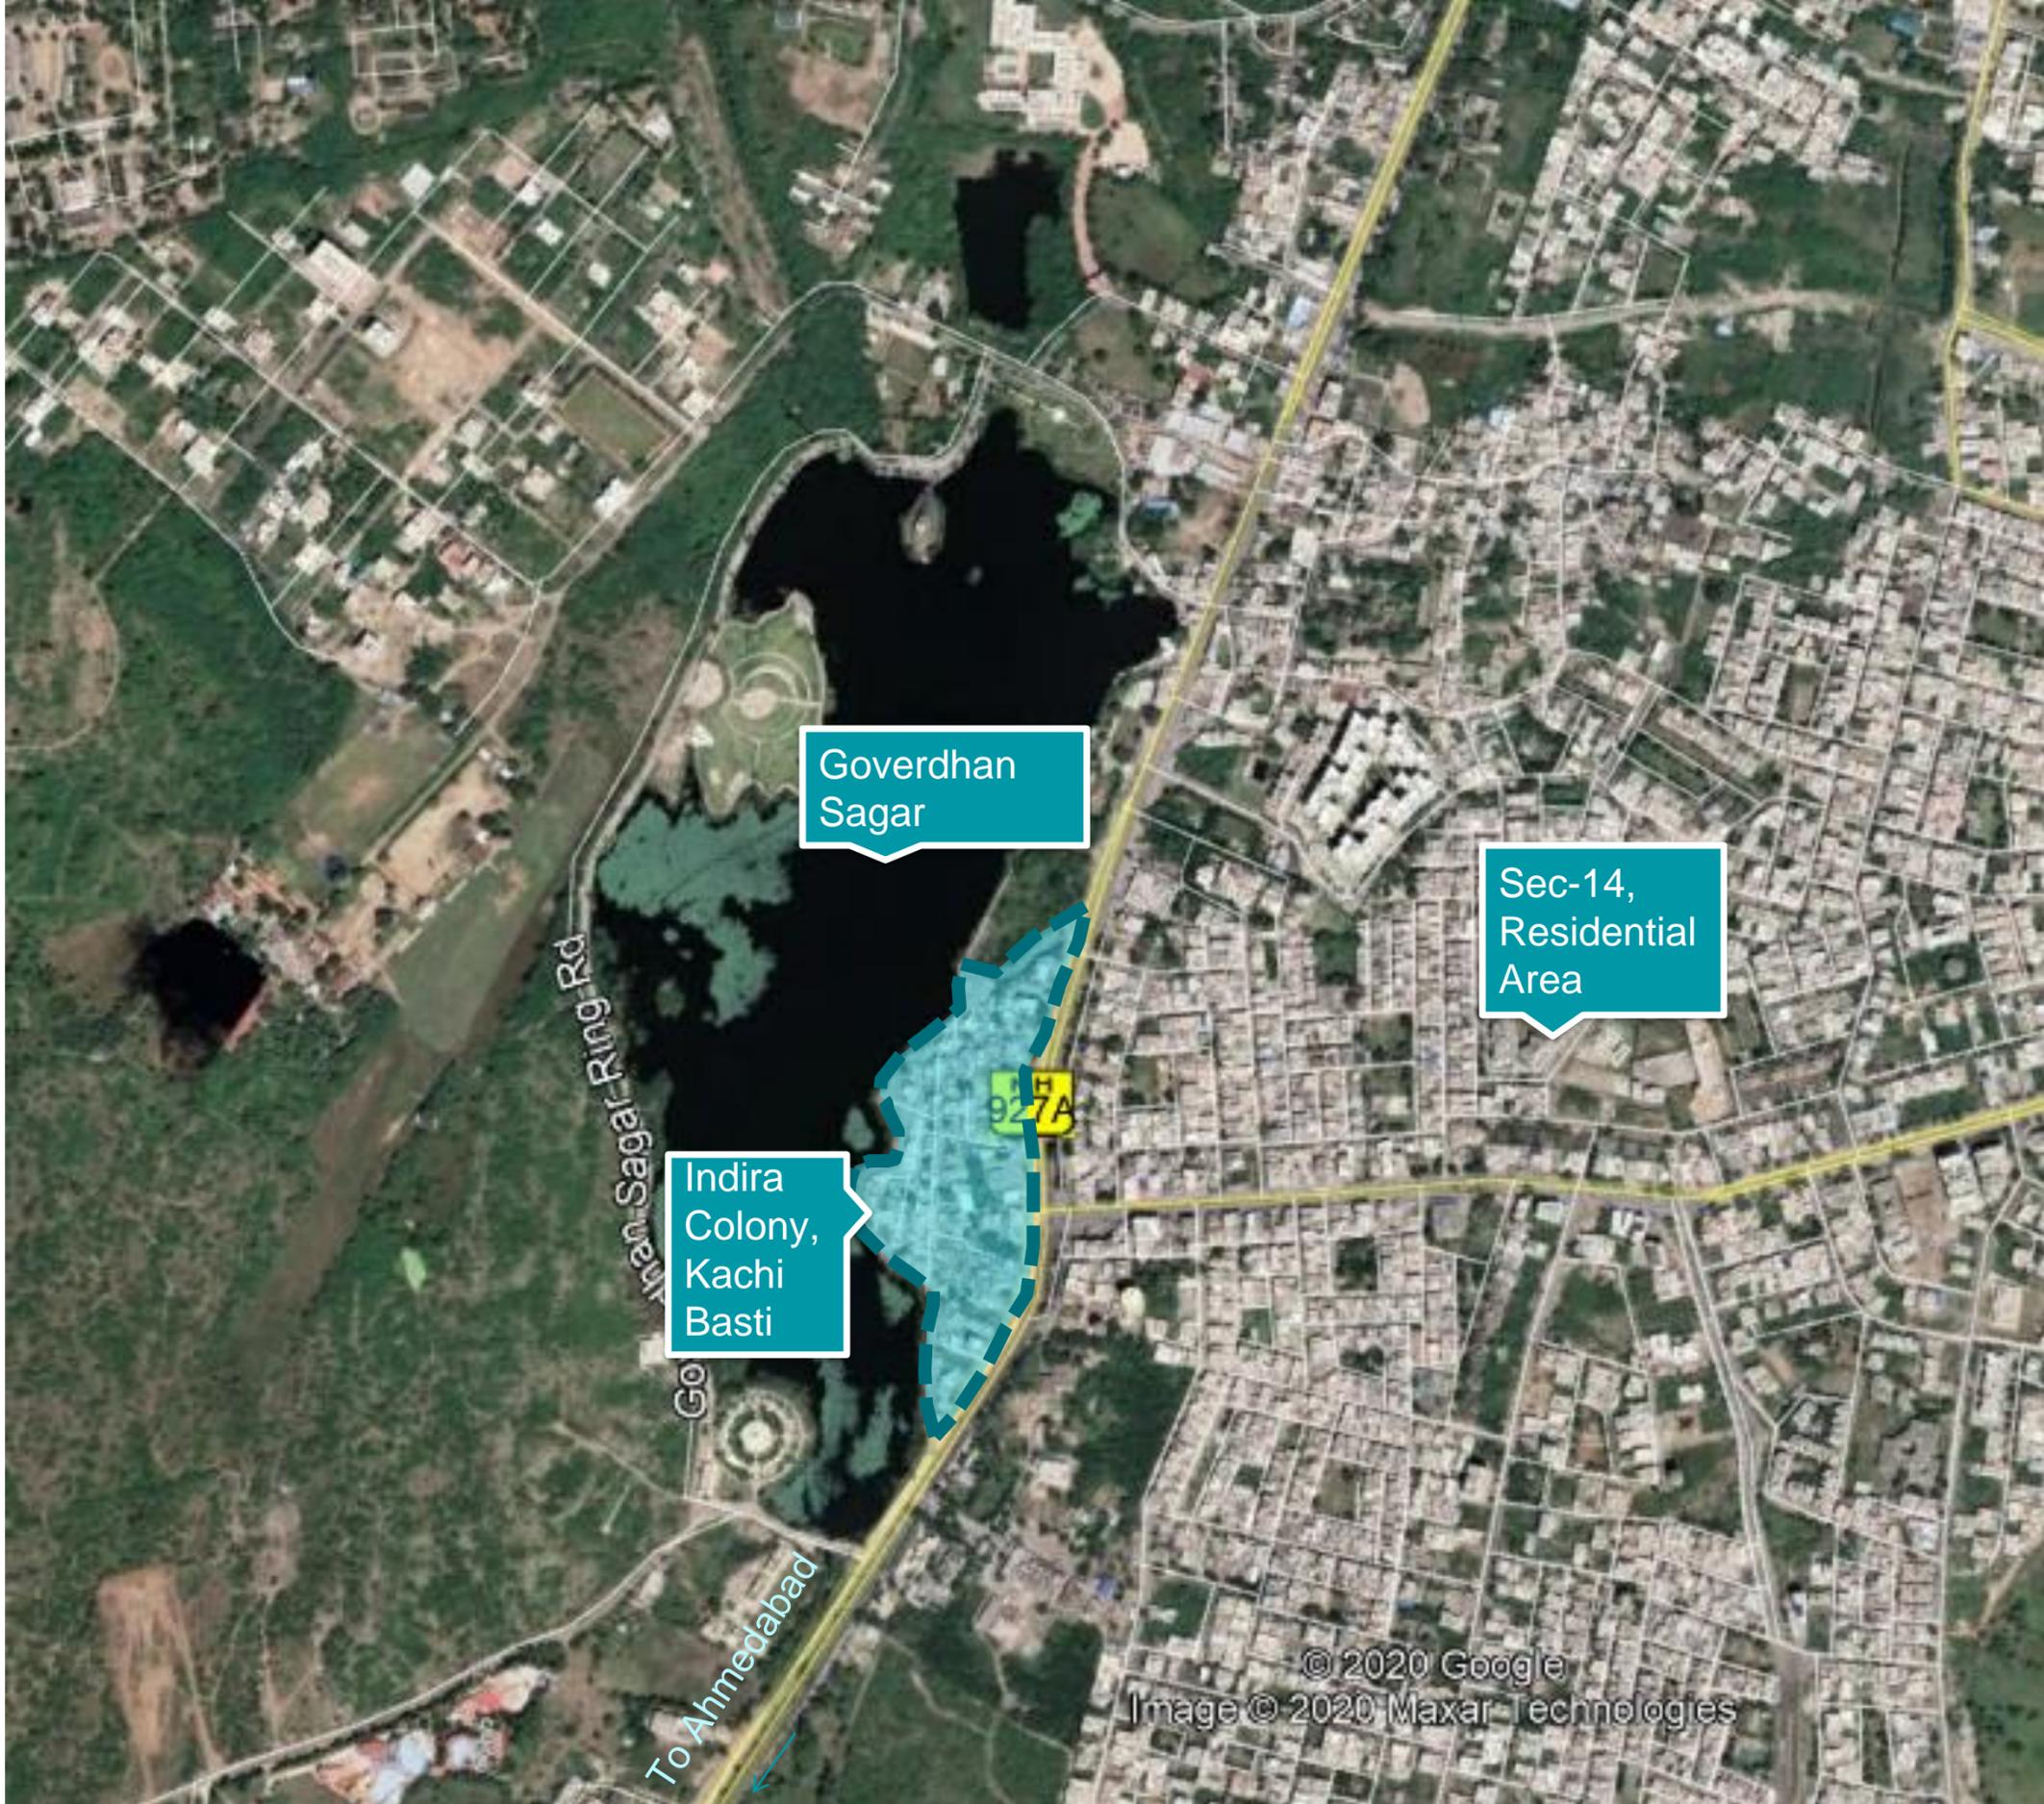

The site is typical commercial in character. This street is being used by vendors, hawkers and is a hub for multiple goods & services. It is also a unauthorised parking place for private buses, taxis/ tempos and shopkeepers vehicles. There is also a Roadways bus stop, which demands a proper channel for buses mobility.

Currently, various vehicles, hand-carts, labourers and shoppers are merging together on streets, leading to an unsafe and chaotic environment on the street.

The design solution should also include a strategy to make the area around the street walking friendly.

[Click here to download site details](#)

Neighbourhood site

*Site B: Goverdhan Villas, Indira Colony
Kachi Basti
Area of pilot: 5 Hectares*

Indira Colony Kachi basti is one of the notified Slum under Municipal Corporation Jurisdiction Area. It is located between Ahmedabad highway and Goverdhan Sagar Ring Road.

It is a unplanned low income neighborhood which is densely populated . The colony lacks lively, green public and interactive & engaging space for small children to play and families to gather.

As one side of the slum open towards Goverdhan Sagar, it also distorts the beauty or view of Goverdhan Sagar.

The design solution should also include a strategy to make the area around the street walking friendly.

Note

All winning teams are expected to assist the city with:

- Refining the design based on the inputs from community, city officials, and other stakeholders;
- Testing the design on the ground;
- Monitoring and Evaluation of implemented design.

Eligibility criteria

Professionals

Students

**Multi-disciplinary
collaborations**

- Professionals and students in the fields of architecture, urban design, planning & other relevant fields are eligible.
- At least 1 team member should be a local resident of the city, who will serve as the representative.
- Multi-disciplinary collaboration is highly encouraged.
- There is no restriction on the number of members per team.

Evaluation criteria

All submitted design proposals will be evaluated based on the following criteria:

- Originality of idea
- Understanding of the local context
- Inclusivity of the design solutions
- Feasibility of implementation
- Fulfilment of submission requirements in the prescribed format

The entries will be evaluated by local officials, citizens, experts, and other stakeholders.

Participation guidelines

- Participants are free to submit multiple entries per team.
- Participants are free to submit entries for multiple cities and for multiple sites per city.
- Any team assisted by a competition organiser or jury member will be disqualified.

Plagiarism of any ideas or images will be disqualified with a notice.

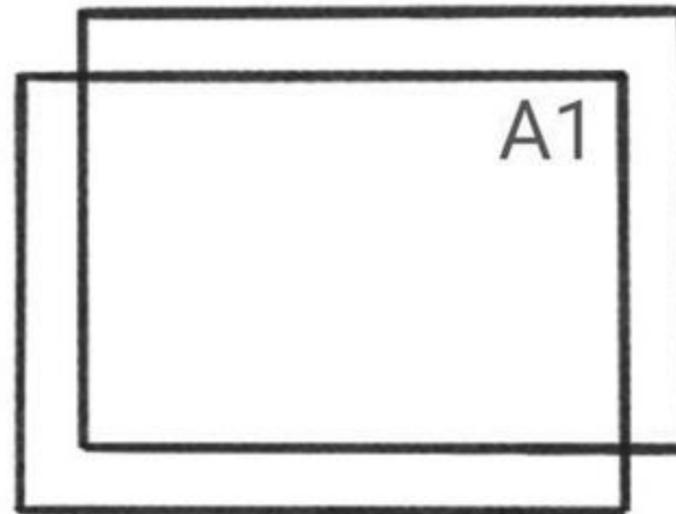

[Register here for the competition](#)

Any change in the timeline will be updated on the competition page in the [Streets for People Challenge website](#)

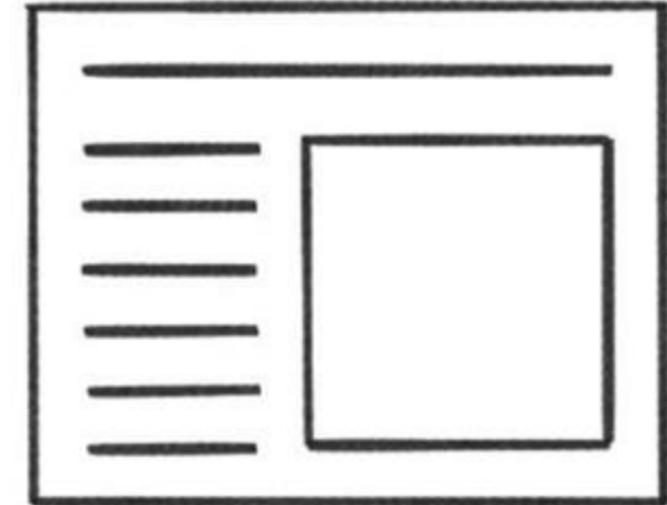

Submission guidelines

- 1 | Participants should create a shared folder (to be renamed with the competition ID), which must contain the **2 A1 sheets and the slide deck (20 slides)**. **Maximum folder size : 25MB**
- 2 | Team registration ID and sheet number should be mentioned at the right bottom corner of every sheet. Team names, logos or organisation names **should not be mentioned** on the sheets.
3. Participants should share the drive link to the shared folder to the email ids below.

2 A1 Sheets must be submitted in .pdf/.jpeg format

+

Slide deck of maximum 20 slides

The submission should cover the following :

- Key plan
- Design concept & diagrams
- Detailed plan and sections of the design intervention
- Implementation strategy addressing parking, vending and other on-site challenges
- Rough budget estimate and phasing
- At least 3 renders / views of the design intervention
- 200-300 word write-up about the design intervention

For any queries, email us at
(uscl2016@gmail.com
apoorvapa@gmail.com)

Awards

Shortlisted Entries

Shortlisted entries will be displayed at the *UDAIPUR Streets for People Exhibition*, and circulated via the city's social media platforms.

Winning Entries

All winning teams will get the opportunity to present, discuss, and develop their ideas with city officials, experts, and the community.

The winning designs will be tested on ground using quick, innovative, and cost-effective tools.
