About

Streets for People
CHALLENGE

The ***Streets for People Challenge*** is an initiative of the Smart Cities Mission, Ministry of Housing and Urban Affairs (MoHUA), Government of India, to inspire cities to create walking-friendly streets through quick measures, in response to COVID-19.

The Challenge aims to create flagship walking initiatives in cities, which focus on placemaking and liveability. 113 cities have registered for this Challenge to reimagine their streets as public spaces through the lens of economic regeneration, safety, and child-friendly interventions, in order to ensure a green recovery from COVID-19.

The city-led design competition aims to crowdsource innovative ideas for designing and testing the pilot interventions through quick, low-cost solutions.

City overview

Kohima

Kohima is the capital city of India's north eastern state of Nagaland. With a resident population of almost 100,000, it is the second largest city in the state.

Kohima was founded in 1878 when the British Empire established its headquarters of the then Naga Hills. It officially became the capital after the state of Nagaland was inaugurated in 1963. Kohima was the site of one of the bloodiest battles of World War II. The battle is often referred to as the 'Stalingrad of the East'. In 2013, the British National Army Museum voted the Battle of Kohima to be a 'Britain's Greatest Battle'.

Kohima had a population of 99,039 of which males and females were 51,626 and 47,413 respectively. Kohima has an average literacy rate of 90.76%, higher than the national average of 79.55%.

The city's population is composed of the 16 tribes of Nagaland.

Call for ideas

The competition is an important step in the *Streets for People Challenge.* It aims to crowdsource innovative ideas from professionals and students from architecture, urban planning, and other relevant fields to design streets for people in their cities.

Following the **test-learn-scale approach,** the competition is looking for economical solutions that are quick, innovative, and easy to test.

The winning designs will be tested on ground using cost-effective tools, in collaboration with the local community.

Register here for the competition

The goal of the competition is
to reimagine streets as
safe, healthy, and happy
public spaces for all!

Design principles

01
Fair distribution of space

Streets for people ensure **efficient mobility** by offering multiple modes of travel, especially **high quality facilities for public and non-motorised transport.**

02
Safety & Security

Streets for people are **safe for all user groups** by providing segregated spaces for each and incorporating **traffic calming measures.** Personal safety is also ensured, with **good lighting** and **'eyes on the street'** through **active street edges and vending.**

Source: Bangalore mirror

03
Comfort

Streets for people are **accessible by all, including the differently-abled. Continuous and even-surfaced footpaths, table-top crossings, ramps, and tactile pavers, wherever level differences occur, seating and trees** are some measures to ensure universal accessibility and better comfort for all users.

04
Sensitivity to local context

Streets for people are **designed to suit the local context, factoring in street activities, patterns of pedestrian movement, nearby land uses, and the needs of the people**. Design interventions can range from contextual street elements to street-level interventions like shared or pedestrianised streets.

Source: Incredible India

05
Liveability

Streets for people are full of life, with **elements that enhance the liveability of the space**. These elements improve conditions for existing users, attract more users, increase retail activity, and **transform the street into a vital public space.**

06
Environmental sustainability

Streets for people promote sustainable modes of transport and **improve local climatic conditions.**Trees and plants help absorb pollutants and improve micro-climatic conditions.

Design tools

Tactical Urbanism is an approach that uses **short-term, low-cost, easy to build,** and **scalable interventions** to catalyze long term change.

Following this approach, we're looking for design and policy solutions that activate spaces to make it **safe, healthy, and happy,** by:

- **Using placemaking elements**
- **Reorganising existing activities**
- **Introducing new activities**

Importance of community

The *Streets for People Challenge* places the **community at the heart** of all design interventions. Emphasising on a bottom-up approach, all design solutions must be in alignment with the **needs of the community** for whom the design is implemented.

Designers must **study and understand the local context** thoroughly and incorporate the findings in the suggested design solutions. Response to local context is a key criteria for final assessments.

The Challenge includes various activities to strengthen the citizen-led approach such as open streets campaigns, walking audits with participants, and perception surveys.

Participation procedure

Step 01: Pick preferred sites → **Step 02: Register here**

↓

Step 03: Participate in the walking audit → **Step 04: Submit your designs**
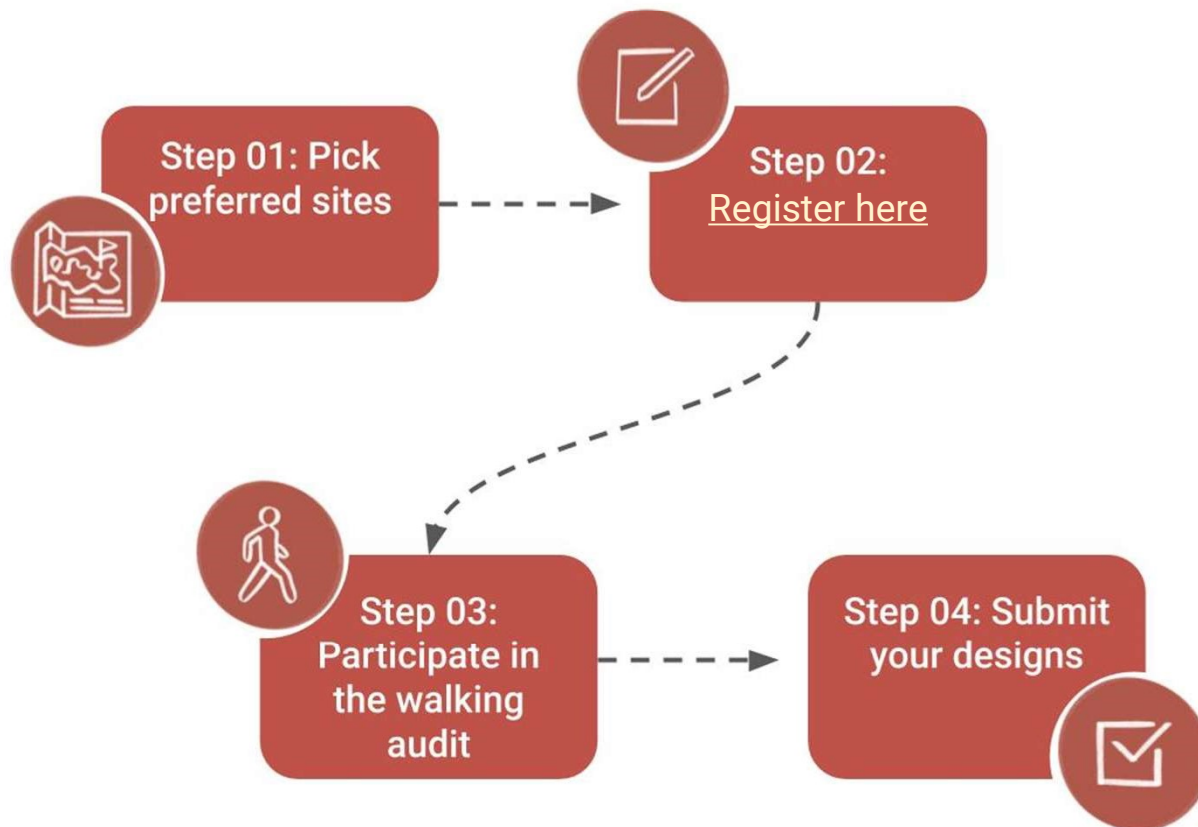

Here are four steps towards the submission!

1 | **Select the sites** for which you wish to develop the design solutions. The information about the sites is provided in the following pages.

2 | Next, please **register** through the given link and let us know!

3 | Join us for the **walking audit** at the pilot sites.

4 | Using the insights from the walking audit, to **develop the design** and **submit them before the deadline!**

We look forward to seeing your awesome design solutions!

Proposal for pilot

Under the **Streets for People Challenge,** the cities will test at least one pilot; comprising of a flagship public space project and a liveable neighbourhood. Hence, this **'call for ideas'** include sites for both components. Participants can select either or both of the sites to provide design solutions.

The sites fall under any of the typologies listed below:

Flagship public space:
1 | Market / Retail areas
2 | Transit hubs

Liveable neighbourhood:
1 | Mixed-income neighbourhoods
2 | Resettlement colonies
3 | Unplanned low-income
        neighbourhoods

Designing the pilot

Flagship public space
- Understand the local context and city's aspirations
- Demonstrate implementable design concepts through complete or partial pedestrianisation strategies
- The design should respond to the vision of the challenge, to create city-level impact

Liveable neighbourhood
- Understand the local context
- Demonstrate implementable design concepts for creating walkable and liveable neighbourhood in holistic manner.
- The design should respond to the needs of local community and ensure safe, inclusive, and comfortable access to amenities and services.

To know more about the typologies, please check out the _Online Workshop 01 presentation_

Flagship pilot site

***Site A: Kohima Walkable Street – NST – Razhu
Area of pilot: 0.33 km / 330 m Stretch***

NST – Razhu Point comprising of about 330m stretch is the center of Kohima City the area is used mainly comprises of mixed used buildings where the ground level host most of the commercial activities , adjacent to the main commercial street the District Administration offices, churches and the public ground are located.

The main road stretch is always packed with one sided parking and a single lane traffic. The pedestrian paths are narrow and the footpaths are often occupied by cars. Citizens all over the city come to this area for shopping or pass through in order to get to the other end of the city.

Key factors to be considered, provide solutions to make the street pedestrian friendly.
Clean, safe and innovative space for local vendors.

Neighbourhood site

Site B: BOC Market Street
Area of pilot: 93m Stretch

BOC Area is one of the oldest settlements of Kohima City. The neighborhood has two prominent hilltops of the city, police establishments , pre-school, hotels and churches. It is a mixed land use area where majority of the low laying residence would walk thorough to reach the highway. The area host one of the largest market for meat, poultry and Agri products. It is also one of the main flea market in the city.

Key factors to be considered, provide solutions to make the street pedestrian friendly.
Clean, safe and innovative space for local vendors.

Timeline

Any changes to the timeline will be notified to the participants in advance.

Competition roll-out
2nd Feb 2020

Registration closes
19th Feb 2020

Walking Audit
15th Feb 2020

Submission by 11:59 pm IST
10th Mar 2020

Announcing of results
15th Mar 2020

Note

All winning teams are expected to assist the city with:

- Refining the design based on the inputs from community, city officials, and other stakeholders;
- Testing the design on the ground;
- Monitoring and Evaluation of implemented design.

Eligibility criteria

Professionals

Students

Multi-disciplinary collaborations

- Professionals and students in the fields of architecture, urban design, planning & other relevant fields are eligible.
- At least 1 team member should be a local resident of the city, who will serve as the representative.
- Multi-disciplinary collaboration is highly encouraged.
- There is no restriction on the number of members per team.

Evaluation criteria

All submitted design proposals will be evaluated based on the following criteria:

- Originality of idea
- Understanding of the local context
- Inclusivity of the design solutions
- Feasibility of implementation
- Fulfilment of submission requirements in the prescribed format

The entries will be evaluated by local officials, citizens, experts, and other stakeholders.

Participation guidelines

- Participants are free to submit multiple entries per team.
- Participants are free to submit entries for multiple cities and for multiple sites per city.
- Any team assisted by a competition organiser or jury member will be disqualified.

**Plagiarism of any ideas or images will be disqualified with a notice.**

Register here for the competition

Any change in the timeline will be updated on the competition page in the *Streets for People Challenge website*

Submission guidelines

1 | Participants should create a shared folder (to be renamed with the competition ID), which must contain the **2 A1 sheets and the slide deck (20 slides). Maximum folder size : 25MB**

2 | Team registration ID and sheet number should be mentioned at the right bottom corner of every sheet. Team names, logos or organisation names **should not be mentioned** on the sheets.

3. Participants should share the drive link to the shared folder at **s4p.kscdl@gmail.com**

For any queries, email us at
(s4p.kscdl@gmail.com)

A1

+

2 A1 Sheets must be submitted in .pdf/.jpeg format

Slide deck of maximum 20 slides
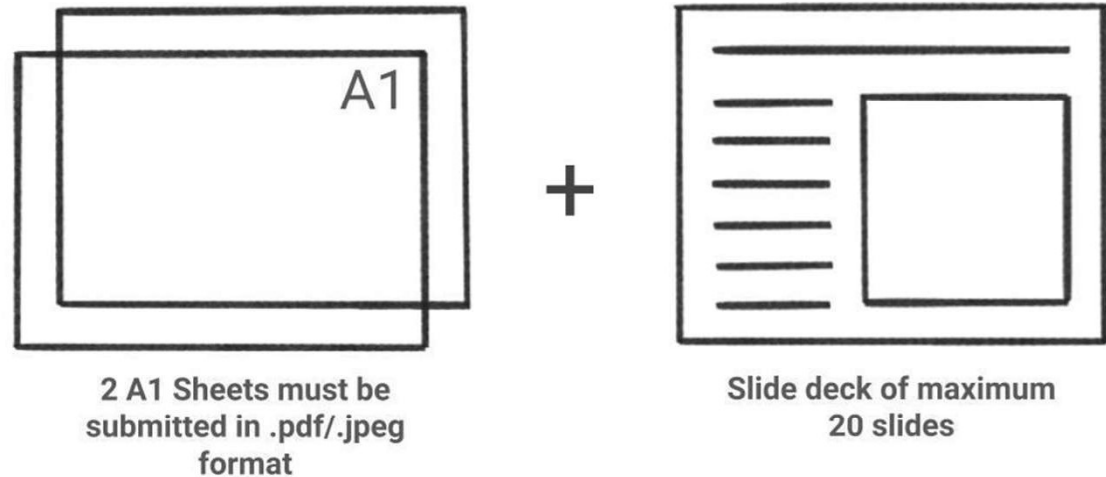

The submission should cover the following :
- Key plan
- Design concept & diagrams
- Detailed plan and sections of the design intervention
- Implementation strategy addressing parking, vending and other on-site challenges
- Rough budget estimate and phasing
- At least 3 renders / views of the design intervention
- 200-300 word write-up about the design intervention

Awards

Shortlisted Entries
Shortlisted entries will be displayed at the *KOHIMA Streets for People Exhibition,* and circulated via the city's social media platforms.

Winning Entries
All winning teams will get the opportunity to present, discuss, and develop their ideas with city officials, experts, and the community.

The winning designs will be tested on ground using quick, innovative, and cost-effective tools.

	1st prize	2nd prize	3rd prize	Gold Mention	Honourable Mentions (5 Entries)
Site 1 Kohima Walkable Street	₹15000	₹10000	₹5000	₹2500	Certificates
Site 2 BOC Market Street	₹15000	₹10000	₹5000	₹2500	Certificates
