

Smart Solutions

Organization: BLACK & VEATCH

Smart city concept :

- Movement toward smarter, more integrated infrastructure systems that extend beyond company and industry boundaries.
- Deliver new sources of value through integration of distributed infrastructure, smart sensors, communications networks, automation systems, big data and analytics.
- Smart Integrated Infrastructure solutions for system-wide intelligence to improve efficiency, reliability and resilience on fundamental services.

Support to programme:

- Black & Veatch designed asset360tm platform to address challenges influencing wide range of actions from real time control to asset management to deployment of new infrastructure
- Black & Veatch expertise in infrastructure and communication technology (ICT)
 - End-to-End smart grid solutions building connected transportation
 - Water energy management remotely managed micro grids
