

# Infrastructure

## Organization : Engineering Projects (India) Ltd.

### Smart city concept :

- EPI offers services in feasibility studies, detailed project reports, design and engineering, supply of plant & equipment, quality assurance, civil and structural works, erection, trial run and commissioning, training of supervisors and operators, operation and maintenance, turn-key project management, project management consultancy.

### Support to programme:

- Songdo city is being built as a 'ubiquitous city' where all major information systems share data and computers are built into the houses, streets and office buildings -
- Urban strategic plan and design for the project was taken care of by POSCO, NSIC acted as the SPV, Gale took care of the financing part and CISCO covered the network and hardware of the project.
- EPI could take up brownfield cities to turn into smart cities.
