

Energy Management

Organization : **The Energy And Resources Institute (TERI)
& U.S. Green Building Council - U.S.G.B.C**

Smart city concept:

Smart cities in India should strive to achieve sustainability goals in energy, water, waste, transportation, liveability / human experience, climate resilience.

Support to programme:

- Us green building council and The Energy And Resources Institute - TERI would provide advisory support to the ministry in the area of environmental sustainability.
- Assistance in terms of tools and technical resources for comprehensive planning
- Application of innovative implementation and management approaches for commercial, residential, transportation and industrial sectors.
