- Trinity products and services works on Mobility Solutions - Mobile Workers, Mobile Task and Mobile Assets to mobilize company - specific data and processes.
- Trinity core capabilities are aligned to deliver vertical mobility solution stack across industries by integrating advanced technologies in GIS, GPS, Command and Control Application Platforms and Mobile Applications.
- Trinity product and services offerings cover:
  - MRM platform
  - GIS based Command and Control Application Platform
  - GIS Spatial Analytics Platform
  - Advanced GPS In-Vehicle Mobile Devices
  - Geo Mobile Application Development
  - Geo Web Application Development

- Work towards providing access to real time, dynamic information on the move with an objective to reduce operating cost, increase productivity, improve customer satisfaction and stream line field operations.

SUPPORT TO PROGRAMME:

- Implementation of Computer Aided Dispatched Application for Personal Safety Answering Points (PSAP) for providing 24 Hours and 7 Days (24x7) helpline service to women in distress and an efficient and effective response system to attend to their calls as well as for alarms related to other emergency services such as medical and disaster (fire etc.)by other responders in an integrated manner.
- Use of Social Apps.- A free downloadable Social App that can be used by citizen to trigger emergency SoS request will be a good choice. The Social App can be installed in smart phones and tablets which are used in large numbers by public.
- Speedy assistance for helpless women/children of a defined area, who face any form of violence, such as eve teasing dowry demands, sexual assault, molestation or any other abuse either in public or at coordination between both systems.
- The solution would demonstrate the capabilities of NG911 network standards for dynamically identifying caller location, exchanging data between emergency call and dispatching centers and Police Dial 100 system.
