

## Advisory

**Organization : USIBC (U.S.-India business council)**

### Smart city concept :

- Smart cities are the integration of – information technology, telecommunications, urban planning, smart infrastructure and operations in an environment geared to maximize the quality of life for a city’s population. Such a coordinated approach from the inception of a metropolitan area
- USA will aid in building three smart cities in Allahabad, Ajmer and Vishakhapatnam.

### Support to programme:

- Joint research and development, technology commercialization and joint business ventures designed to promote trade and investment
- USIBC assembles American and Indian industry and government leaders to discuss contemporary opportunities and challenges faced in high technology trade across life sciences, manufacturing and strategic trade.
- A conclave to bring together officials of both nations was organized by USIBC
