INSTRUCTION TO BIDDER FOR SUBMISSION OF E-BIDS

A. Submission of e-Bids:

The Bid Submission module of e-procurement website <http://etender.up.nic.in> enables the bidders to submit the e-bids online against this bidding published by the purchaser. Bid may be submitted only during the period and time stipulated in the bidding. Bidders are advised to start the Bid Submission process well in advance so that they can submit their bids in time. The bidders shall submit their bids taking into account the server time, displayed in the e-procurement website. This server time is the time by which the bid submission activity will be allowed till the permissible time on the last date of submission stipulated in the schedule. The bidders cannot submit their bids after the completion of bid submission period. For delay in submission of bids due to any reasons, shall be responsibility of the bidder. The bidders shall follow the instructions mentioned herein under for submission of their e-bids.

- i. For participating in bids through the e-bidding system, it is necessary for the bidders to be the registered users of the e-procurement website <http://etender.up.nic.in>. The bidders shall first register themselves on the e-bidding website, if they have not done so previously, using the option “Click here to enroll” available on the home page of the website.
- ii. In addition to the normal registration, the bidder has to register with their Digital Signature Certificate (DSC) in the e-bidding system and subsequently he/ she will be allowed to carry out his /her bid submission activities. Registering the Digital Signature Certificate (DSC) is a one-time activity. Before proceeding to register their DSC, the bidder shall first log on to the e-bidding system using the User Login option on the home page with the logging ID and Password with which they has registered as per clause i above. For successful registration of DSC on e-procurement website <http://etender.up.nic.in> the bidder must ensure that they possess class-2 /Class-3 DSC issued by any certifying authorities duly approved by Controller of Certifying Authorities. The bidder is also advised to register their DSC on E-procurement website well in advance before bid submission period & time so that they do not face any problem while submitting their e-bid against this bidding. The bidder can perform User Login creation and DSC registration exercise as described in clauses above even before bid submission period starts. The purchaser shall not be held responsible if the bidder tries to submit their e-bid at the last moment of submission of bid, but could not submit due to DSC registration problem.
- iii. RFP DOCUMENT FOR CONSTRUCTION, OPERATION AND MAINTENANCE OF SMART BUS-Q-SHELTERS AT VARIOUS LOCATIONS IN AGRA ON BUILT, OPERATE AND TRANSFER (BOT) BASIS WITH ADVERTISING RIGHTS UNDER PPP MODE

and may be extended till the decision to award the contract at the instance of ASCL. The Bid shall be summarily rejected if it is not accompanied by the Bid Security in the prescribed format.

The RFP document cost is Rs.5000 plus GST acceptable through Demand Draft in favor of Chief Executive Officer, Agra Smart City Ltd payable at Agra. The bid document should be downloaded from the government website of <http://etender.up.nic.in> The scanned copy of RFP document cost in the form of Demand Draft from Nationalized/Scheduled Bank shall be enclosed at the time of submission of bid. The cost of RFP document shall not be refunded under any circumstances. The Bid shall be summarily rejected if it is not accompanied with the RFP document cost.

1.4 BID PARAMETER

As per the selection criteria, bidders are required to quote the consolidated concession fee for all the sites (details given in the RFP itself) that it offers to pay to ASCL from the date of signing of the Concession Agreement. **The total Concession fee shall be the criterion for the selection of the Bidder.** Total amount of concession fee quoted by the bidder shall be escalated by 5% per year on cumulative basis and such escalated amount shall be payable for subsequent years. The criteria for selection of the bidder shall be the one who offers the highest concession fee which shall be payable to ASCL. The bidder shall quote only one figure as per the financial bid format which is to be uploaded online. Any ambiguity in respect of the quoted price by the bidder shall render the bid liable for rejection.

Selected bidder shall require paying to ASCL a sum of Rs. 5 lakhs (Rs. Five Lakhs only) as upfront amount after issue of Letter of Acceptance but before signing of the Concession Agreement (CA).

The successful bidder shall have to pay the total concession fee for the respective year by seventh day of the commencement of the year. The first of such installment shall be payable w.e.f. 121st day from the date of signing of the agreement. The Concession period shall be 15 years from the date of signing of the Concession Agreement.

The first instalment of such escalated amount of Concession Fee shall be payable by us on the seventh day of the commencement of that year. The first of such installment shall be payable by us on 121st day from the date of signing of the Concession Agreement between us and ASCL.

Quoting of negative CF amount is not permissible.

The number of BQS are at present 166, but this number may increase or decrease as per the new road development and may decrease as and when required by the CEO, ASCL, Agra. For any increase or decrease in the number of BQS from the above stated figure of 166, the concession fee shall be adjusted on proportionate basis. GST and all other applicable taxes shall be payable by the concessionaire at its own cost to the authorities concerned.

Only one figure of Concession fee is to be quoted for the financial offer. Quoting more than one figure will render the bid liable for rejection.

In case the highest bid being equal in respect of more than one bidder, on being called upon by ASCL, the financial offer shall be submitted again by such highest bidders to break the tie. The

revised offer shall, however, not be lower than the originally quoted figure. Any revised offer lower than the original offer shall be liable to be rejected.

Volume 2 – Project Information Memorandum and Formats for Bid Submission

2 PROJECT INFORMATION MEMORANDUM AND FORMATS FOR BID SUBMISSION

2.1 PROJECT BACKGROUND

The Agra Smart City Limited is engaged in the implementation of the Smart City Mission projects in Agra and as part of this endeavour, the Authority has decided to undertake Construction, Operation and Maintenance of Smart Bus-Q-Shelters at various locations in Agra on Built, Operate and Transfer (BOT) basis with Advertising Rights under PPP Mode.

2.1.1 AGRA

Agra is the city of the inimitable Taj Mahal. It is as loved by Indians as it is by foreigners who throng here in large numbers to admire its beauty. Along with Delhi and Jaipur, Agra forms the Golden Triangle of tourism in India. Situated in Uttar Pradesh, it borders Sadabad and Hathras on the north, Bharatpur on the Far-Western Region, Tundla, Firozabad and Fatehabad on the east and Dholpur to the south and Mathura- Vrindavan to the North West. Agra is synonymous with the Taj Mahal; however there's lot more to the city than this world-famous monument. Right from the

epic Mahabharata to the Mughal Dynasty, Agra has been monumental and has played a significant role in shaping India's history. Agra has two UNESCO World Heritage sites which is Agra fort and Taj Mahal however Taj Mahal features in the 50 most popular tourist destinations in the world.

2.1.2 MOBILITY IN AGRA

Public transportation is a form of travel offered locally that enables more people to travel together along designated routes. Public transport is the hallmark of a good transportation system for a city. For a state like Uttar Pradesh, which is earmarked as the "Heritage State", as it provides good impetus to the tourist population, the role of public transport is vital, particularly to reduce the use of personalized transport. To keep the public transportation system in line with the state-of-art and to fulfil passenger requirements, it is essential to provide not only clean transportation but also safe and connected transportation.

As per the report received from UPSRTC, the number of vehicles in Agra has grown by 45% from 4.25 lakhs in 2003-04 to 6.15 lakhs in 2010 of which 76% are two wheelers. This has had an impact on the average journey speed, which is less than 15kmph on nearly 65% of the network. Heavy congestion is witnessed in the city during the peak hours, however it is more pronounced during the morning peak hours when nearly 65% of the major road network comprising of MG road, NH2 and other arterial roads has average journey speed less than even 10 kmph. The increased vehicle ownership has also affected the trip rates for the city.

Agra, Mathura City Transport Service Ltd. have total 230 buses in Agra viz. 10 AC, 10 non-AC low floor Macro Polo Buses, 75 Tata buses, 75 Swaraj Mazda Buses and in Mathura 60 Swaraj Mazda Buses. It covers the entire city and is used by daily commuters like office goers, students, senior citizen and ladies. The buses majorly operate on two routes, i.e., urban (within city) and nearby Agra. There are 3 entry points to the Agra city and majority of buses in urban area ply on 4 routes.

The existing public transport system available for performing inter-city trips mainly consists of buses operated by UPSRTC and private operators. The intra-city travel within the city is primarily through buses, tempos, auto rickshaws and cycle rickshaws. The city bus service in Agra City operates through private operators. As on date, buses are operational on 8 circular routes and 6 direct routes in Agra City. Average length of the said routes is 21 kms. A total of 293 CNG buses are operational on these routes. However, it has been observed that a large number of buses are operating on profitable routes rather than prescribed routes.

2.1.3 BUS TRANSPORT IN AGRA

Just like any other global city, Agra is also facing pollution in air giving birth to various air-borne diseases. To minimize this, along with Non-Motorized Transport [NMT], like, cycle, rickshaws, pedestrian walking, etc. public transport has a very crucial role to play. To cater to this, currently, UPSRTC [Uttar Pradesh State Road Transport Corporation] is plying City and Regional buses to various locations across the City and neighbouring Regions from the following locations:

- a) Bijli Ghar [Agra Fort]- City and Regional Buses
- b) Idgah Bus Depot- City and Regional Buses

2.1.4 BUS SHELTERS IN AGRA

Excerpted from Public Space Amenities: A Guide to their Design and Management of in Downtowns, Neighbourhood Commercial Districts and Parks, published by Project for Public Spaces.

A good bus shelter is an essential part of any successful urban mass-transit system. What constitutes "good," however, depends upon your point of view. From the perspective of the city agency that is responsible for its management, a good shelter is one that has low maintenance requirements and is vandal-resistant. From the rider's point of view, an ideal shelter is one that allows visibility and easy access to the bus, is comfortable and convenient, provides clear information, and is safe.

Both viewpoints are equally important to consider, because an unused shelter is a waste of money and an unnecessary maintenance problem. A well-designed, comfortable shelter can make waiting for a bus a pleasant -- and even interesting -- experience! Unfortunately, many poorly designed shelters also exist.

Out of 201 locations where bus halts in Agra, there are only 25 locations which have a bus shelter out of which many are not in use because some have been vandalized, some are being used as shelters for the homeless, at some buses do not stop because of poor planning, etc. On the contrary,

there are locations, where buses do stop and passengers wait under a tree, but there are no bus shelters.

2.1.4.1 IS A BUS SHELTER NEEDED?

There are some general guidelines that are being followed in deciding whether or not a bus shelter is needed. Situations where a shelter is required include the following: neighborhoods where buses run infrequently; commercial areas with frequent service and high levels of ridership; areas where security is a problem; neighborhoods where there are many older or infirmed people; and areas where inclement weather is common.

2.1.4.2 LOCATION

Bus shelters are being located near retail stores that have products related to bus riders' needs (e.g. bakery, flower shop, newsstand, etc.) and are open late at night; near office building entrances within view of a security guard; near street vendors; and in conjunction with other amenities such as telephones, benches, and so on.

Specific guidelines for locating bus shelters are noted below:

Bus shelters near intersections are being set back from the crosswalk approximately 10 feet to avoid conflicts with pedestrian traffic. If a bus stop is on the far side of an intersection, the shelter is being located a minimum of 40 feet from the crosswalk to allow adequate room for the bus to stop. A distance of 3 feet is being kept between the bus shelter and the curb for free movement in boarding and exiting from the bus. Bus shelters long side are being paralleled to the sidewalk to minimize interference with pedestrian traffic. Exit and entry openings are being oriented so that people are protected from the wind. However, the side of the shelter facing the street is open to allow passengers to board or exit the bus easily. Elements such as information kiosks or vendors that can obstruct the view of oncoming buses are being located "down-stream" from the shelter.

2.1.4.3 DESIGN

Some bus shelters are being designed to reflect the city of Agra. This is being accomplished through the use of local materials, design details and reflecting the unique characteristics of Agra.

Within this context, these four general qualities are kept into account- visibility, accessibility, comfort and convenience, and information.

⊕ Visibility

People must be able to see the bus coming. Poorly designed shelters that obstruct views of approaching buses will force people to leave the shelters to watch for oncoming buses.

⊕ Accessibility

People must be able to board the bus conveniently. To many riders this is the most important aspect of a bus shelter's design, because people like to be close to the point where the bus door will open so they will be sure of getting on. The shelter should not obstruct this process of boarding.

⊕ Comfort and Convenience

Shelters should provide a place to sit, protection from weather, and a feeling of safety and security.

⊕ Information

People need to know when a bus will arrive and where it will go. This is especially important for people who are unfamiliar with the service, such as tourists.

2.1.5 AGRA NAGAR NIGAM

Agra Nagar Nigam (ANN) is a local government committed to provide basic infrastructure facilities including entertainment facilities to the people of the city. ANN is very well known for managing the city by using private sector participation as well as introduction of innovative mechanism in management to serve people efficiently. City has prepared different plans for improving services and to nullify gap between services and demands. The other key agencies in the city and sub-region which are responsible for urban planning and urban management functions include Agra Development Authority, Public Works Department and Jal Kal Vibhag.

In 2011, Agra had a population of 15,85,704 with 71.58% literacy. The increase in population has led to increase in the number of motorised transport vehicles. This increase has led to traffic congestion, road accidents, air and noise pollution. To minimise this, Agra Nagar Nigam is committed to promote Public Transport, like, City Buses run by UPSRTC [Uttar Pradesh State Road Transport Corporation] and Modern [functional] Bus Shelters with advertisement booths in the city of Agra.

Therefore, Agra Nagar Nigam through Agra Smart City Limited (ASCL) decided to float a Request for proposal for Construction, Operation and Maintenance of Smart Bus-Q-Shelters at various locations in Agra on Built, Operate And Transfer (BOT) basis with Advertising Rights under PPP Mode for a period of 15 years. In this project, Smart Bus-Q-Shelters would be constructed at various locations of the city which are shown in Annexure – 4 of this RFP – Description for Smart Bus-Q-Shelters.

ASCL is now issuing “Request for Proposal” (RFP) and inviting Technical and Financial Proposals from the interested bidders to Built, Operate and Transfer (BOT) the Project. The project is proposed to be implemented by selected bidder against rights for display advertisements for a period of 15 years in Agra city which includes the construction period of 6 months. The project shall be developed as per the Standards and Specifications stated in this RFP and best industrial practices in India. The project would be completely financed by the Concessionaire. In consideration the

Concessionaire shall have access to revenue accruing Advertisement rights at designated spaces in the Smart Bus-Q-Shelters as specified in this RFP.

2.2 PROJECT FRAMEWORK

2.2.1 IMPLEMENTATION STRATEGY

ASCL intends to develop the project on “Build, Operate and Transfer” (BOT) basis by inviting Private Sector Party (Concessionaire) to construct, operate and maintain the Bus Shelters for a specified Concession Period of 15 (Fifteen) years. ASCL will enter into a Concession Agreement with the Concessionaire for the implementation of the project on Public-Private Partnership (PPP) mode. The Concessionaire, during the Concession period, shall carry out the services as per the technical specifications, performance standards and guidelines given as part of the Concession Agreement which forms a part of this RFP document. The Bus Shelters shall be transferred to ASCL free of cost, after the expiry of the Concession Period, in sound condition as per Concession Agreement. The implementation period for the project will not be more than six months within which the Concessionaire will complete the Construction of Smart Bus Shelters as per the requirements, technical specifications and standards. The title, interest, ownership and rights with regard to Bus Shelters (including all its associated elements i.e. advertisement panels etc) constructed by the Concessionaire for ASCL along with fixtures/fittings provided therein shall vest with the ASCL except that these will be operated and maintained by the Concessionaire as agreed. The assets created by the Concessionaire will be under the possession of the Concessionaire during the period of the Concession except under specific circumstances, as defined in the Concession Agreement, and will be transferred to ASCL upon the expiry or earlier termination of the Concession Agreement. These assets will not be encumbered by the Concessionaire in any circumstances in any manner whatsoever subject to terms & conditions of Concession Agreement.

2.2.2 REVENUE GENERATION:

The Concessionaire shall, during operation period, be entitled to collect revenue from external parties through display of advertisement at the Smart Bus Shelters at earmarked spaces as defined in the concession agreement but the type of advertisement shall have to be approved by the ASCL so that no objectionable advertisement is placed on surface of Bus Shelter.

2.2.3 SCOPE OF WORK:

The project scope would include the following major activities:

- a) **Construction Works:** This includes construction of smart, modern user and environment friendly Bus Shelters as per the design/drawings and specifications approved by ASCL. Preference would be given to the designs depicting various architectural features of cultural importance, like, arches, sun- shading devices, domes, jalis, etc. The design needs to be merged with the urbanscape and the prevailing traffic movement.
- b) **Operational Management:** This includes Bus Shelters operations i.e. regular cleaning of the shelter and its surrounding areas, functioning of user amenities, functioning of clock, display and updating of route maps and commuter information, availability of basic infrastructure requirements such as electricity, proper drainage, waste removal, etc. and any other essential task/activities would form part of operations. Display of GPS/GSM or other technology based

digital information system, if installed, will be responsibility of the concessionaire under agreement period.

- c) **Maintenance Works:** It will include routine and periodic maintenance works in the Bus Shelters but shall not be limited to the following:
- ⊕ Civil, electrical and mechanical works for the Bus Shelters
 - ⊕ Furniture and Equipment maintenance and servicing
 - ⊕ Maintenance and overall cleanliness.
- d) **Transfer of Smart Bus-Q-Shelters:** On completion of concession period or prior termination of the contract, all the Smart Bus Shelters shall be transferred to ASCL on the free of cost. The bidder shall be solely responsible for employing adequate staff to perform the obligations as provided in concession agreement. The successful bidder shall be solely responsible for complying with all the applicable laws as well as for paying the salaries, wages, dues, PF & ESI etc. of such employees. No such employee shall be deemed to be employee of ASCL for any purpose whatsoever. The Design philosophy for Construction, Operation & Maintenance of the Smart Bus-Q-Shelters Concept as **Annexure-1**

2.2.3.1 SERVICES TO BE PROVIDED INCLUDING THE MAINTENANCE:

- a) **Water Supply Arrangement:** The Concessionaire shall arrange adequate water for general cleanliness of the Bus Shelter.
- b) **Electricity Supply:** The Concessionaire shall ensure adequate electricity supply for proper lighting of the Bus Shelter and advertisements. ASCL shall only facilitate the concessionaire for getting an electricity connection; However the concessionaire shall be solely responsible for arranging and providing the same and bear all costs for connection as well as regular payment of necessary consumption and other charges. Concessionaire shall provide required equipment for storage of solar energy and supply of electrical energy at Bus Shelters. If some grant/ central Assistance schemes are their in the systems, ASCL shall provide administrative support to avail the facility.
- c) **Landscaping:** The Concessionaire shall put flowering plants and other shrubs around each Bus Shelter to the extent possible on both sides as per the approval of the ASCL and maintain the same in good condition at all times.
- d) **Cleaning of the Bus Shelter:** The concessionaire shall ensure regular cleaning of the Bus Shelter. This shall include sweeping of the floor of Bus Shelter at least thrice a day.
- e) **Garbage Disposal:** The concessionaire shall install litter bins as specified near the Bus Shelter and disposal of the collected waste at appropriate location shall be the responsibility of the Concessionaire.
- f) **Safety & Security:** The safety and security of the Bus Shelter rests with the Concessionaire. The Concessionaire shall maintain security personnel, gadgets as required as part of the maintenance services.
- g) Any other work as needed and agreed upon jointly by ASCL and the Concessionaire.

2.2.4 PROJECT COST

The project cost would include the cost of construction comprising civil, electrical and other costs and the recurring annual cost associated with operation and maintenance of the Smart Bus Shelters

over the concession period. The concessionaire shall also pay required taxes such as GST, entertainment tax, all statutory fees and taxes etc. as applicable under the law.

ASCL will carry out a detailed evaluation of the Bids in order to determine whether the technical aspects are in accordance with requirements set forth in the Bid Documents. In order to reach such a determination, the ASCL will examine and compare the various technical aspects of the Bids on the basis of the information supplied by the Bidders, taking into account the following factors:

- a) Overall completeness and compliance and deviations from the ASCL requirements to the Proposal/conditions. The Bid that does not meet minimum acceptable standards of completeness, consistency and detail will be categorized as non responsible and shall be liable for rejection.
- b) Working methods and program demonstrating that how the Bidder will achieve the performance standards within the time frame. Each responsive Bid shall be given a technical score based on weight ages assigned to various parameters of technical proposal as given below. A proposal may be rejected at this stage if it is non responsive or if it fails to achieve minimum technical score of 60 out of 100. Only those bidders, whose aggregate technical score is above stipulated minimum technical score, will be qualified for the opening of financial bids and evaluation thereof. ASCL shall notify to qualified bidders the outcome of technical evaluation. The financial proposal of those bidders who do not qualify the Pre-qualification cum technical evaluation shall be rejected and no claim in this regard shall be entertained.

2.3.3 OPENING OF FINANCIAL BID AND EVALUATION

At the end of evaluation of Pre-qualification cum technical proposals, ASCL shall invite bidders who have submitted substantially responsive Pre-qualification cum technical proposals and who have been determined as qualified, for opening of financial bids. The bidders shall then be requested to attend the opening of Financial Bids. The schedule and venue for opening of financial bids shall be duly intimated to the substantially responsive bidders well in time. Following shall be read out and recorded at the time of opening of financial bids: The name of the bidder, Whether there is a modification or a substitution, The bid price i.e. the Concession Fee quoted by the bidder payable to ASCL w.e.f. 121st day from signing of the Concession Agreement with 5% escalation per annum on cumulative basis for subsequent years. Any other details the ASCL may consider appropriate. A summary of the financial offers made by various bidders shall be tabulated and a copy of the same shall be put up on the website of ASCL. ASCL shall then evaluate the financial bids of all the responsive bidders. In case of difference in the offer quoted by the bidder in figures and the words, the offer quoted in words shall prevail.

2.3.4 SELECTION AND NOTIFICATION

The highest financially evaluated bidder, based on the quoted concession fee and accepted by the ASCL would be selected as successful bidder and would be intimated through a “Letter of Award”.

2.3.5 AWARD OF CONTRACT

Upon issuance of the “Letter of Award” the selected bidder shall have to communicate the acceptance of the contract through a “Letter of Acceptance” within 15 (Fifteen) days of issue of the Letter of Award and sign the Concession Agreement within 40 (Forty) days of issue of “Letter of Award”. The concessionaire shall be required to deposit an upfront amount of Rs. 5 lakhs to ASCL through a bank draft/banker’s cheque payable in favour of ASCL. This upfront amount shall be payable by the selected bidder within 20 (Twenty) days from the issue of LoA. The Concession agreement shall not be signed between the parties without the selected bidder depositing the upfront amount. The successful bidder shall be required to furnish Performance Security for implementation as specified in the Schedule of Agreement before signing of the Concession Agreement and till that time, the Bid Security of the successful Bidder would remain effective and shall continue to be in

possession of ASCL. If the bidder fails to deposit the upfront amount and/or the Performance Security as per preceding paragraphs and subsequently fails to sign the Concession Agreement within 40 days of issuance of the “Letter of Award”, ASCL shall reserve the right to withdraw the offer, and proceed ahead in any manner it deems fit. In such an eventuality, the Bid Security of selected bidder would be forfeited.

2.3.6 EXTENSION OF VALIDITY OF BID

In exceptional circumstances, prior to expiry of the original Bid Validity Period, ASCL may request the Bidders in writing to extend the Bid Validity Period (and also the bid security validity) for a specified additional period. A bidder shall be at liberty to refuse to concede to such a request to extend validity of his bid without forfeiting his Bid Security. However, a bidder conceding to the request shall not be permitted to modify his bid in any manner whatsoever.

ANNEXURES

ANNEXURE 1 - DESIGN PHILOSOPHY FOR CONSTRUCTION, OPERATION & MAINTENANCE OF THE SMART BUS SHELTERS CONCEPT

The concept of Smart Bus Shelters envisages maximum utilization of available space, i.e., the waiting space along with boarding-alighting space. Concept shall be clear from the sketch/conceptual design provided with the document. The BS may be in the form of a Single Shelter Unit (SSU). The SSU shall be wider and will cover an area of approx. 30sqm. (10.0m x 3.0m). Size may vary as per the space availability at respective site/place. Spaces for Passenger Information Systems and Public Information Systems like maps etc. are provided with Advertisement spaces at SSU. These will be based on the concept design as provided.

Smart Bus-Q-Shelter Planning:

Salient features of a typical bus shelter as per the requirements are as follows:

1. The maximum area of shelter shall be used by the public to provide better level of comfort. This provides easiness between boarding alighting and waiting space.
2. Absence of backside covering at some part, allow better natural light & Ventilation at the shelter.
3. The desirable platform level at the bus shelter shall be about 400mm above the road carriageway surface.

RFP DOCUMENT FOR CONSTRUCTION, OPERATION AND MAINTENANCE OF SMART BUS-Q-SHELTERS AT VARIOUS LOCATIONS IN AGRA ON BUILT, OPERATE AND TRANSFER (BOT) BASIS WITH ADVERTISING RIGHTS UNDER PPP MODE

4. The arrangement of the bus shelter is assessed on a shelter-to-shelter basis and is determined by site constraints and passenger access requirements. However, it is planned in such a way that maximum utilization of space can be achieved for public comfort and adequate circulation space.
5. Sufficient space for queuing and passenger flow to be ensured at the shelter. However, the available space may be constrained by local site conditions. Besides this, the other considerations should be:
 - a) Adequate capacity for passenger movements.
 - b) Convenience, including good signage relating to system information, circulation and orientation.
 - c) Safety and security, including a high level of protection against accidents.
 - d) Adequate safety measures against fire to be taken.
 - e) Electrical safety standards like ELCB and earthing etc. to be provided.
6. Following miscellaneous requirements have to be considered:
 - a) Minimum operating costs are incurred consistent with maintaining efficiency and the safety of passengers.
 - b) Flexibility of operation including the ability to adapt to different traffic conditions and provision for the continuity of operation during any extended maintenance or repair period, etc.
 - c) Provision of good visibility at shelters, Natural light, ventilation and other utilization areas aiding more efficiency and safety.
 - d) Provision of display of passenger information and advertising.
7. In order to transfer passengers efficiently from street to footpath and from footpaths to shelter and vice versa, the spatial planning has to be based on established principles of pedestrian flow and shall minimize avoidable walking distances and cross-flows between incoming and outgoing passengers.
8. Passenger handling facilities comprise of ramps, walkways and boarding - alighting area, required to process the peak traffic from street to platform and vice-versa. These facilities must also enable evacuation of the shelter under emergency conditions.
9. The substructure and the super structures that afford maximum transmission of natural light and are architecturally/ aesthetically pleasing to look at are envisaged. The structures/sub components, wherever necessary, shall look compatible with both, modern environment as well as the lesser-built developments along various sections of the bus route corridor. This has to be done without compromising with environmental protection from sun and rain.
10. Shelter roofs are proposed to be of sleek SS frame with polycarbonate sheet or better material to achieve slender appearance. The disposal of rain water and dirt from the roof should be taken care of.
11. **Accessibility:** Shelters are design on the concept of free flow of Passenger Traffic. No gates are provided at the shelter. Ramp is provided one side for physically challenged passengers.
12. **Lighting:** Since the bus operations are scheduled to be extending over a period of 16 hrs, adequate lighting is necessary along with natural lighting, ensuring minimum illumination levels of 60 lux in the waiting, boarding and alighting areas. The uniformity ratio (Average Intensity/

RFP DOCUMENT FOR CONSTRUCTION, OPERATION AND MAINTENANCE OF SMART BUS-Q-SHELTERS AT VARIOUS LOCATIONS IN AGRA ON BUILT, OPERATE AND TRANSFER (BOT) BASIS WITH ADVERTISING RIGHTS UNDER PPP MODE

Minimum Intensity) should be 2 (Two). Solar panels and batteries for lighting in B S and for the advertisements is a preferred option.

13. **Floor/Landing Surfaces:** The floor should be firm, stable and anti skid type, consisting of either concrete or pre polished concrete designer tiles 20 mm thick of approved colour, shape and pattern, in floor jointed with neat cement slurry/binding material, over a bed of 150 mm cement concrete mix of 1:4:8 and 50mm thick cement mortar of 1:6 mix. The non slippery tiles to be laid as per provisions for physically challenged. These should be easily washable and cleanable, acid resistant.
14. Necessary cut-outs for electric connections, lighting, for advertisement panel's etc should be provided at required places in the sub structure or superstructure in a concealed manner.
15. **Painting Work-** To be minimized to the extent possible by use of suitable material, however on plastered surfaces, a primer coat and three coats of Plastic paint (duco paint is preferred) and on mild steel members, a primer coat with 2/3 coats of enamel paint. In case of Aluminum section, anodizing of 20 microns is recommended.
16. **Steel Work/ frames:** Vertical/horizontal members for demarcating and segregating different types of areas, to the extent possible, to be of prefab type, able to house the hanging/fastening of display panels, informative maps etc.
17. **Roof:** Preferably to be Polycarbonate sheets/any other similar material and Steel work in built up tubular trusses, to be Fire retardant. The characteristics may be summed up as: Virtually unbreakable, high resistance to weathering-temperature variation as per Agra conditions, easily fabricated & installed, Low flammability, Light Weight, Easily Cleaned, Excellent Insulation Properties. The material should also be suitable for Cutting, Drilling, Bending and Thermoforming. The roof has to withstand live loads such as that of the cleaning staff and for monkeys, which jump on roofs.
18. **Steel Work as Sub Structure:** Pre-fab to the extent possible, SS Steel in built up tubular trusses including cutting, hoisting, fixing in position, welded and bolted including special shaped washers etc. complete above plinth level.
19. **Area for advertisements:** The minimum areas to be made available for advertisements to the Concessionaire shall be as given below. Of the total area available on internal panels, some area has to be ensured for system information (such area is not included in the area available for advertisement at SSU), the do's and don'ts, guide maps, plans and social messages etc.

The minimum available areas/spaces:

S.No	Space Size	Area (Sq.m)
1.	Front 9.85 m X 1.05 m	10.3425
2.	Right Side 2.45 m X 1.15 m	2.8175
3.	Left Side 2.45 m X 1.15 m	2.8175
4.	Ad Panel (outer) 1.45 m X 1.685 m	2.44325

VARIOUS LOCATIONS IN AGRA ON BUILT, OPERATE AND TRANSFER (BOT) BASIS WITH
ADVERTISING RIGHTS UNDER PPP MODE**

- i. The Concessionaire shall promptly and in such sequence as is consistent with the Construction Requirements, submit a copy of each of the Drawings to the Project Engineer and ASCL.
- ii. By forwarding the Drawings to the Project Engineer and ASCL pursuant to the preceding sub-clause (i), the Concessionaire shall be deemed to have represented that it has verified and determined that the Drawings forwarded are in conformity with the Construction Requirements.
- iii. Within 15 days of receipt of the Drawings, the Project Engineer shall review the same taking into account, inter alia, comments of ASCL, if any, thereon, and convey its comments/ observations to the Concessionaire on the conformity of Drawings with Construction Requirements. If the comments/ observations of the Project Engineer indicate that the Drawings are not in conformity with the Construction Requirements, such Drawings shall be revised by the Concessionaire to the extent necessary and resubmitted to Project Engineer for further review. The Project Engineer shall give its observations and comments, if any, within 15 days of receipt of such revised Drawings, which shall be taken into account by the Concessionaire while finalising the Drawings.
- iv. The Concessionaire shall be responsible for delays in meeting the Construction Requirements caused by reason of any Drawings not being in conformity with the Construction Requirements, and shall not be entitled to seek any relief in that regard from ASCL.
- v. The Concessionaire shall in consultation with the Project Engineer/ Authorised officer finalise an Implementation Schedule for the Project in accordance with the Construction Requirements.
- vi. Within 30 days of issue of the Completion Certificate or Provisional Completion Certificate, as the case may be, the Concessionaire shall furnish to ASCL three copies of "as built" Drawings of the Construction Works which have been completed as on COD, in a manner as set out in Construction Requirements.

4.4 PROJECT IMPLEMENTATION

- a. Unless otherwise permitted by ASCL, no Construction Works shall begin until the Project Engineer approves it.
- b. The Concessionaire shall within 10 (ten) days from the Appointed Date submit to the ASCL/ Project Engineer the Implementation Plan for execution of the Construction Works and shall adhere to the same.
- c. The Concessionaire shall submit such documents and reports as are reasonably required by the ASCL/ Project Engineer for issue of the Completion Certificate.
- d. The Concessionaire shall get the Drawings approved by competent authority and as per Applicable Laws.
- e. The Concessionaire shall make his own arrangements for adequate and timely supply of electricity, water and other utilities required for execution of the Construction Works and ASCL shall be in no way responsible for the same.

ADVERTISING RIGHTS UNDER PPP MODE**

- f. During Construction Period, the Concessionaire shall be responsible for keeping unauthorized persons off Project Site, and authorized persons shall be limited to the employees of the Concessionaire, employees of his subcontractor and persons authorized by ASCL or Project Engineer.
- g. The Concessionaire shall adhere to Construction Requirements; achieve COD on or before the SPCD. Provided that, on the written request by the Concessionaire for extension of time, ASCL may consider such a request. However, such extension shall in no case exceed six months from SPCD. In the event Concessionaire is not able to achieve COD within such extended period, it shall be deemed a Concessionaire Event of Default under Clause 8.1(a).
- h. The Concessionaire may undertake Construction Works by itself or through a Contractor possessing requisite technical, financial and managerial expertise/ capability; but in either case, the Concessionaire shall remain solely responsible to meet the Construction Requirements.
- i. The Concessionaire shall, before commencement of Construction Works; have requisite organization and designate and appoint suitable officers/ representatives as it may deem appropriate to supervise the Project, to deal with the Project Engineer/ ASCL and to be responsible for all necessary exchange of information required pursuant to this Agreement;
 - i. provide and maintain a reasonably furnished site office accommodation for the Project Engineer, at the Project Site.
- j. For the purposes of determining that Construction Works are being undertaken in accordance with the Construction/ Fabrication Requirements, the Concessionaire shall with due diligence carry out all necessary and periodical Tests in accordance with and as per the instructions of the ASCL/ Project Engineer and such Tests shall be carried out under the supervision of the Project Engineer. The Concessionaire shall maintain proper record of such Tests and the remedial measures taken to cure the defects or deficiencies, if any, indicated by the Test results.
- k. If the Tests are successful and the BQS Facility can be safely and reliably opened for operation, the ASCL/ Project Engineer shall issue the Completion Certificate within 7 days of the completion of such Tests.

Provided that, notwithstanding that certain works or things forming part of Construction Works are not complete, if following Tests the Project Engineer determines that the Project Facility can be safely and reliably opened for operations, the Project Engineer may issue Provisional Completion Certificate to the Concessionaire. The Provisional Completion Certificate shall have appended thereto a list of outstanding items signed jointly by the Project Engineer and the Concessionaire ("Punch List"). All Punch List items shall be completed by the Concessionaire within such time as may be determined by the Project Engineer, but not exceeding 60 days from the date of issue of the Provisional Completion Certificate. Upon satisfactory completion of all Punch List items, the Project Engineer, shall promptly and in any case within 7 days thereof, issue the Completion Certificate.

- l. If the Concessionaire fails to complete the Punch List items within the said period of 60 days, ASCL may, without prejudice to any other rights or remedy available to it under this Agreement, have such items completed at the risk and costs of the Concessionaire. In such an event, the Concessionaire shall reimburse to ASCL, one and half times of the cost incurred by ASCL in completing the Punch List items, (as certified by the Project Engineer), within 7 days from the

date of receipt of a claim in respect thereof from ASCL. The Project Engineer may issue Project Facility Completion Certificate only upon such reimbursement being made by the Concessionaire to ASCL.

- m. The ASCL/ Project Engineer, may, by written notice, require the Concessionaire to suspend forthwith the whole or any part of the Construction Works, if in its reasonable opinion the same is being carried on in a manner that is not in conformity with the Construction/ Fabrication Requirements.
- n. The Construction/ Fabrication Works shall be deemed to be complete and ready for commercial operations only when the Provisional Completion Certificate or the Completion Certificate is issued by the Project Engineer in accordance with the provisions hereof.

Provided if COD is delayed beyond 90 days of the SPCD, ASCL shall, subject to the provisions of Article 8, be entitled to terminate this Agreement and to appropriate the Performance Security.

4.5 OPERATION AND MAINTENANCE

- a. The Concessionaire shall operate and maintain the BQS Facility in accordance with the O&M Requirements.
- b. The Concessionaire may undertake operations and maintenance of the Project Facility by itself or through a Contractor possessing requisite technical, financial and managerial expertise/ capability; but in either case, the Concessionaire shall remain solely responsible to meet the O&M Requirements.
- c. The Concessionaire shall, during the Operations Period :
 - i. shall have requisite organization and designate and appoint suitable officers/ representatives as it may deem appropriate to supervise the Project Facility, to deal with the Project Engineer/ ASCL and to be responsible for all necessary exchange of information required pursuant to this Agreement;
 - ii. shall, for the purposes of determining that the BS/ Project Facility is being maintained in accordance with the O&M Requirements, the Concessionaire shall with due diligence carry out all necessary and periodical Tests in accordance with and as per the instructions of the ASCL/ Project Engineer and such Tests shall be carried out under the supervision of the Project Engineer. The Concessionaire shall maintain proper record of such Tests and the remedial measures taken to cure the defects or deficiencies, if any, indicated by the Test results.
- d. In the event the Concessionaire has failed to operate and maintain the Project Facility in accordance with the O&M Requirements, and such failure has not been remedied despite a notice to that effect issued by the Project Engineer/ASCL (“Notice to Remedy”), ASCL may, without prejudice to any of its other rights/remedies under this Agreement, be entitled to cause the repair and maintenance of the Project Facility at the risk and cost of the Concessionaire. The Concessionaire shall reimburse one and half times the costs incurred by ASCL on account of such repair and maintenance within fifteen (15) days of receipt of ASCL’s claim therefor.
- e. The Concessionaire shall be deemed to be in material breach of O&M Requirements, if ASCL, acting reasonably and in accordance with the provisions of this Agreement, has determined that due to breach of its obligations by the Concessionaire,

- i. the maintenance of the Project Facility or any part thereof has deteriorated to a level which is below the acceptance level prescribed by the O&M Requirements;
- ii. there has been a serious or persistent breach in adhering to the O&M Requirements and thereby the Project Facility or any part thereof is not safe for operations;

For avoidance of doubt, persistent breach shall mean:

- I. any breach of O&M Requirements by the Concessionaire which has not been remedied by the Concessionaire despite a Notice to Remedy in respect thereof issued by the ASCL;
- II. recurrence of a breach by the Concessionaire, during the pendency of Notice to Remedy by the ASCL requiring the Concessionaire to remedy a breach, and
- III. repeated occurrence of a breach notwithstanding that earlier breaches have been remedied pursuant to Notice to Remedy or otherwise.

Upon occurrence of Material Breach of O&M Requirements, ASCL shall, without prejudice to and notwithstanding any other consequences provided therefor under this Agreement, be entitled to terminate this Agreement.

- f. No demolition/ removal of structure shall be allowed during the last five (5) years of the Concession Period, unless specifically approved by ASCL.
