Executive Director

Jabalpur Smart City Limited

## Expression of Interest and Call for Proposal for the Preparation of City Disaster Management Plan (CDMP) for Jabalpur City

This Expression of Interest and Call for Proposal is issued by the Jabalpur Smart City Limited to obtain proposals from reputed and registered agencies such as Societies/Trusts/Academic and Research Institutions/Consulting Agencies (or consortium thereof) to enter into a contract for Preparation of the City Disaster Management Plans (CDMPs) for Jabalpur City.

### Project Background

With passing of Disaster Management Act., 2005, a paradigm shift has occurred in realm of Disaster Management with emphasis on plans, preparedness and mitigation of Disasters. It is now imperative to have a strategy by integrating all existing resources and opportunities under unified plan to stipulate effective mitigation mechanism.

Urban DRR (Disaster Risk Reduction) is about multi-sectoral efforts for reducing disaster risks associated in cities and towns. This means assessing exposure to hazards of urban populations due to diffused governance, environmental degradation and overstretching of resources. The overall aim of urban risk management is to reduce vulnerabilities and strengthen resilience of urban communities. This becomes more important in the light of fast growing urban settlements and infrastructures. There is a need to visualize the need of urban resilience in long term perspective and develop strategies for next two to three decades. This attains unprecedented importance due to Smart Cities in India. The futuristic plan for DRR (Disaster Risk Reduction) requires advance planning and researches Urban settings have some unique characteristics which should be kept in mind while developing a DRR strategy. These include population concentrations, infrastructure, complexity of poverty, social inequality, political and economic 0 value, the types of hazard faced and potential impact of those hazards, community integration and social cohesion besides the capacity of communities to cope with disasters.

In addition to natural disasters, urban areas are prone to many other kinds of disasters which are due to the nature of population and settlements in urban setup. There are more incidents of *road accidents, fire, stampede, urban flooding, solid waste; e-waste and bio-waste management, safe drinking water and drainage problems etc. in urban areas. Pollution in terms of air, noise and environmental degradation is acute in cities.* Dense Population and Overcrowding, Unhygienic Living Standard and Related Health Problem, Growing numbers of Slum Dwellers, Inadequate Public Infrastructure, Inadequate Public Transport, Sewerage Problems, Inadequate Safe Water Supply, Unorganized and non-engineered infrastructure, Lack of Safe Housing, Problem of Public Safety and Urban Crimes are other challenges for Urban resilience.

*Further various events of mass gathering such as festivals like Ganesh Puja Durga Puja, Chhath Puja, ID*

*Celebrations, Moharram Processions or political congregation* have been a regular feature in urban areas. This requires specific preparedness and interventions by the Urban Local Bodies.

The City Disaster Management Plans (CDMPs) will include —

1. Identification of various hazards (natural, human induced and environment & climate change related) in the concerned Municipal Corporation limits roles and responsibilities of concerned stakeholders etc. through HRVCA process.
2. Disaster specific mitigation and response plans in the context of a particular city/urban area.
3. Expected outcome of implementation of plans within a specific time frame.
4. Structural and non-structural issues to be covered with regards to different disasters.
5. Linkage of the Plan with the upcoming concept of Smart Cities.
6. Roles and responsibilities of ULBs/DDMAs/SDMA and State agencies.
7. How to make the particular areas as Resilient Cities with Resilient Critical Infrastructure and Resilient Livelihood as per DRR Roadmap.
8. Any other important issue, as decided by JSCL.

#### **Responsibilities of the Agency:**

- I. The agency will have to prepare a detailed City Disaster Management Plan for assigned city.
- II. The format for data collection and field verification will be finalized jointly by JSCL and the agency which shall be as per the requirement of JSCL.
