

BACK TO THE CITY

Vol. 01

Streets

Implemented by
giz Deutsche Gesellschaft
für Internationale
Zusammenarbeit (GIZ) GmbH

Quality public spaces

Urban life in the streets needs space and room - especially in times of crisis.

Do not let physical distancing become social distancing. Give more space to the footpaths. For example, you can transform modular parklets to quickly become a part of the streets' fabric benefitting local culture, health and wellbeing.

#reclaimstreets, #localculture,
#streetismylivingroom

Cycling and Walking

Cycling and walking are the most sustainable and safest ways to move in urban areas.

Promote these ways of transport and make it an integral part of your transit and public health strategy.

#resilienturbantransport, #greenmobility, #streetsforpeople

Follow the Social Discipline Circles

No street life without people. But in times of Covid it needs a good discipline to maintain physical distance.

Help the citizens by constantly reminding them of physical distancing. Make use of floor signing as a tactical urbanism strategy.

#tacticalurbanism, #keepthedistance
#lowbudgetintervention

Street Art to Spread Public Awareness

Increasing the ownership of local communities in the fight of Covid19 is crucial. Visibility and good communication is important.

The street is your canvas. Make use of local artists for example for safety campaigns through street art and public awareness.

#streetart, #awarenessraising,
#togetherwearestrong

Border Disease Control Checkpoints

The streets divide the city into smaller areas and zones. Those natural borders and zones can help to structure and strategize the fight and control of the disease.

Create health checkpoints at prime borders and big crossings in the city. Enrich those points with public health facilities.

#stopcovid, #testandmanage,
#fightthespread

SUMMARY

Promote cycling and walking and make it an integral part of your transit and public health strategy.

Do not let physical distancing become social distancing. Give more space to the footpaths.

Make use of floor signing as a tactical urbanism strategy in the walking zones.

Make use of local artists for example for safety campaigns through street art and public awareness.

Create health checkpoints at prime borders and big crossings in the city.
