

THE INDIA ADVANTAGE SUMMIT 2017

GLOBAL PARTNERSHIPS FOR BUILDING SMART CITIES IN INDIA

ON THE 21ST AND 22ND OF SEPTEMBER 2017

STRATEGIC PARTNERS

Hanns Seidel Foundation India

THE CONTEXT

The 100 smart cities mission of the government of India that seeks to invest \$15 Billion in the next years to build efficient and effective city management solutions and infrastructure

SUMMIT VISION

To share, discuss, ideate and facilitate partnerships that can bring innovative practices, best case studies and globally tried and tested 'smart city' solutions to India

SUMMIT DATES

21st and 22nd of Sept. 2017

HOST CITY

Bangalore, India.

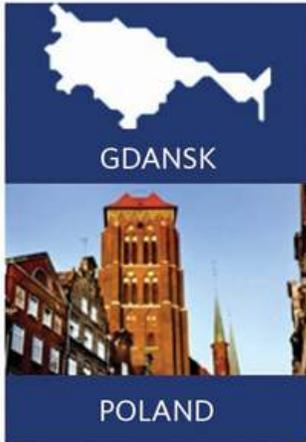

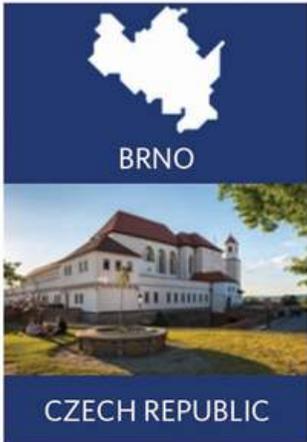

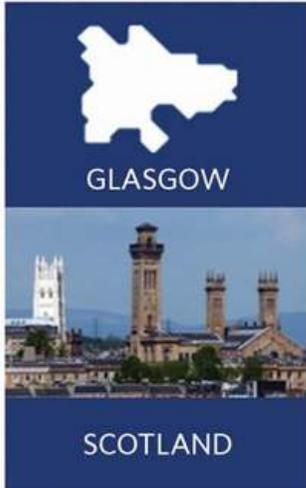

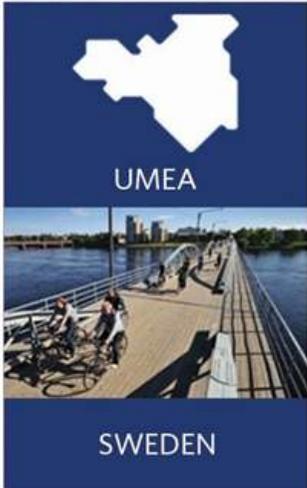

KEY PARTICIPANTS

- ✓ Decision makers from the declared smart cities of India
- ✓ Global & Indian firms engaged in the SMART Cities domain
- ✓ Developers of SMART Township projects in India
- ✓ University Professors involved in SMART City initiatives

SPECIAL SUMMIT SHOWCASE

RUGGEDISED >>

An inter-city innovation & co-operation model will be presented at the TIA Summit - 2017

FOLLOWER CITIES

LIGHTHOUSE CITIES

RUGGEDISED is a smart city project funded under the European Union's Horizon 2020 research and innovation programme. It brings together three lighthouse cities and three follower cities

To test, replicate and accelerate the shared deployment of smart solutions from energy, e-transport to digital technology in diverse city test-beds, with special attention to governance, business models, data and energy management, and urban systems integration.

Working in partnership with businesses and research centres RUGGEDISED will demonstrate how to spur innovation, boost market uptake with higher energy and environmental standards and thereby reduce energy consumption, noise, CO2 and pollutant emissions to create smart, resilient cities for all.

Grand**
BANGALORE HOTEL
AT BRIGADE GATEWAY

GLOBAL PARTNERSHIPS FOR BUILDING
SMART CITIES IN INDIA

**ON THE 21ST AND 22ND
OF SEPTEMBER 2017**

THEMATIC MODULES OF THE SUMMIT

INNOVATIVE

Solution based platforms to promote innovative and creative approach to address the various logistical and transient challenges within cities. Exploring collaborative systems or mechanisms to bring innovative solutions to the challenges that face the cities of today and the future.

SUSTAINABLE

Seeking a holistic approach to a green, clean, carbon neutral and efficient resource & waste management model for cities. To discuss and ideate feasible frameworks and modelling that balance resource needs and productivity indices of the city.

CONNECTED

Exploring the creation of Digital Urban Spaces, Seamless and efficient Mass transit systems, Integrated ICT systems to enable deliver of services, GPS anchored and Networked Real estate systems and Management, Integrated city Management Platforms and augmented virtual reality solutions for real-time city management.

SECURE

Global growth in urbanization worldwide has tipped over the 50% mark of total world population and in this context creates structural challenges that influences cities and their security. As this trend rises - keeping the city safe and secure for all the diverse groups is critical to sustain a healthy social balance.

INCLUSIVE

The great challenge that policy makers and economists have always faced is to ensure equity and justice, as growth and productivity rise. This session will explore strategies to ensure that the urban poor and marginalized have access to resources and opportunities in the smart cities of the future.
