How LastMileCode Works

Last Mile Code

1. **GENERATE** a standard, complete, correct, comprehensive, latitude-longitude (GPS) embedded postal address for your home, office, shop etc.
2. **CONVERT** the lengthy, descriptive postal addresses into a **12 digit unique number** to make it convenient in sharing.
3. **NOW** mention only 12 digit LastMileCode whenever you want to communicate your address with anyone. Extremely useful while sharing postal address with a person belonging to other city or other state or other language or other country.
4. **PROVIDES** Ecosystem 24x7 to decode the Code into Address through Mobile App, Website, API, SMS gateway (like 58888), Toll-free Call Centre etc.
5. **Call Centre** will provide telephonic navigation support to courier / delivery boy, guests or anybody wanting to reach your place/LastMileCode location, on behalf of the end user
